

NEPHILIM ARE HERE – Part Six: ALIENS MIXING DNA & BLOOD

Why do I say Holy Spirit instead of “The” Holy Spirit?

Remember last week we spent a lot of time talking about what the aliens have been doing here with their abductions and harvesting organs and collecting our eggs and sperm to keep their race alive and make hybrids. What we are about to talk about is continuing along those same lines so we can see how far it has gone and is still progressing.

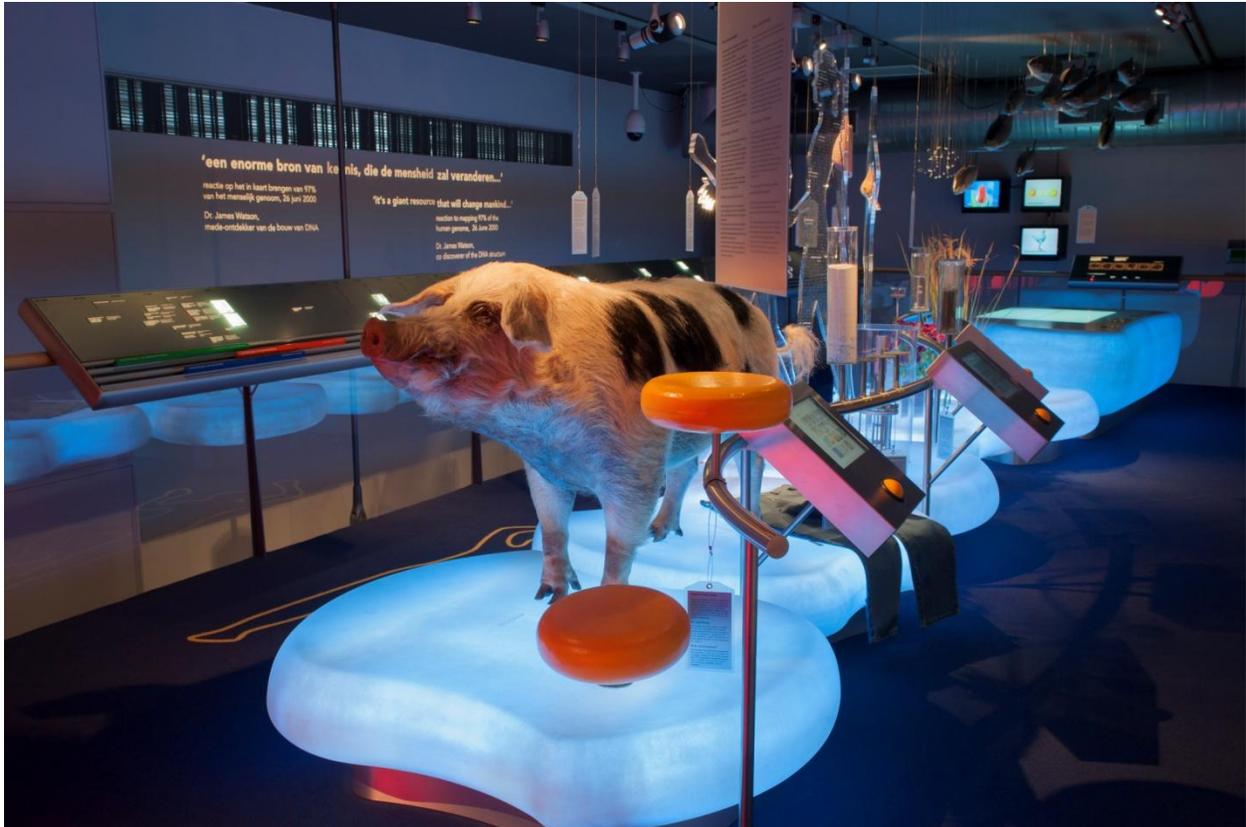

DNA ADDED TO FOOD

satan is still mixing dna and blood to taint God’s creation (humans). He is also continuing to create his own hybrid race to keep his own seed alive which came about through the fallen angels. A [recent survey](#) by the Oklahoma State University Department of Agricultural Economics finds that over 80 percent of Americans support “mandatory labels on foods containing DNA,” about the same number as support mandatory labeling of GMO foods “produced with genetic engineering.”

If they survey shows we support mandatory labels, means they aren’t even labeling all of it now. Just like on bottled water, they don’t even have to tell you the source of it. It could be straight out of the tap somewhere.

An example of what the label for DNA additives might read like:

WARNING: This product contains deoxyribonucleic acid (DNA). The Surgeon General has determined that DNA is linked to a variety of diseases in both animals and humans. In some configurations, it is a risk factor for **cancer and heart disease. Pregnant women are at very high risk of passing on DNA to their children.**

This is a transgenic pig for cheese production. "Transgenic Organism" is an organism whose genetic makeup has been altered by the addition of genetic material from another, unrelated organism. (so this is mixing of cow and pig dna)

DNA is contained in fruits and veggies and the animals we eat. **BUT IS IT NECESSARY TO ADD IT TO OUR FOOD? IS IT NECESSARY TO ADD MODIFIED DNA INTO OUR FOOD???**

- The process of extracting DNA from a cell is the first step for many laboratory procedures in biotechnology.
- Each cell contains 9 feet of DNA. In an average meal, you eat approximately 55,000,000 cells or
- about 93,205 miles of DNA.

Yes, eating DNA is having negative effects on our bodies. The government and their paid scientists want us to believe it has no effect but that is a lie.

Our bodies are not passing these things out with no interference, they are not being broken down during digestion as they are implying but are surviving the

digestion process. **Dr. Oz talked about fake butter and that our body doesn't recognize the ingredients in stuff like that and doesn't know what to do with them and they don't just pass through our systems.**

A Subway restaurant in Knoxville, Tennessee is now equipped with a product known as SelectaDNA, which aims to tag anyone who breaks in with an identifying spray containing a DNA code viewable only under ultraviolet light.

This is for some of you who still don't believe that they can spray DNA just like spraying chemtrails.

CHEMTRAILS

Chemtrails contain genetically engineered biological agents and make people sick. Does this not hint at an intentional attempt by the implementors of the chemtrail program to perform mass gene therapy upon the population? And what are chemtrails ultimately attacking? Our cellular DNA.

Mass Human Mutation

What is a mutation?

The [dictionary](#) says,

'The process by which such a sudden structural change occurs, either through an alteration in the nucleotide sequence of the DNA coding for a gene or through a change in the physical arrangement of a chromosome.'

The most revealing article is an interview with Dr. **Berrenda Fox**.

"Everyone has one double helix of DNA. What we are finding is that there are other helixes that are being formed. In the double helix there are two strands of DNA coiled into a spiral.

It is my understanding that we will be developing twelve helixes. During this time, which seems to have started maybe 5 to 20 years ago, we have been mutating. This is the scientific explanation. It is a mutation of our species into something for which the end result is not yet known.

The changes are not known publicly, because the scientific community feels it would frighten the population. However, people are changing at the cellular level. I am working with three children right now who have three DNA helixes.

These are children who can move objects across the room just by concentrating on them, or they can fill glasses of water just by looking at them. They're telepathic. You would almost think by knowing these children that they are half angelic or superhuman, but they're not. I think they are what we are growing into during the next few decades.

DNA Activation Sprays

**Individual & Spray Sets

Modification of DNA Sequence

Influx of walk-ins, alien souls, or attached entities account for this modification.

DNA is sensitive to more than just electromagnetic fields. It also responds to the body's soul nature. Soul nature is the vibrational etheric/astral composition or signature of a particular soul. Genetic structure and soul nature are intimately coupled; a change in one can lead to a delayed change in the other.

[Walk-ins are](#) souls who replace the native soul in a body. If the soul nature is different, then DNA will change accordingly.

As far as the mutation phenomenon chemtrails seek to combat are concerned, if walk-ins are indeed one source of DNA modification, then the souls walking in are of alien (foreign, not of this world, demonic) origin.

Just a note – the release date stands for 666 because if you add all that up it is 18 which is 3 x 6 or 666.

Under the mandate for aerial spraying for specific vectors that pose a threat to human health, aerial vaccines known as DNA Vaccine Enhancements and

Recombinant Vaccine against WNV may be tested or used to “protect” the people from vector infection exposures.

Tested the person and found the following: The individual tested positive; indicating a highly probable exposure to a DNA vaccination delivery system through nasal inhalation.

**Major corporations are putting aborted baby tissue in many of the products we eat and drink for flavoring purposes. They are also putting them in vaccines and beauty products. Pretty sure we don't baby tissue in our food or anything for that matter.

Picture taken at Dulce Base of alien cryo tanks and vats of food.

Since they eat us and drink our blood and want our body fluids (adrenocrome), they are trying to get us to do the very same thing and be what they are. This also helps them to mix in their blood or dna.**

The bad news is that we also may not be aware that many states have created biobanks funded by genetic material left over from our screening tests, and, even

more surprising, our specimens may be used for purposes we do not fully understand or for which **we have not granted informed consent.**

Biobank

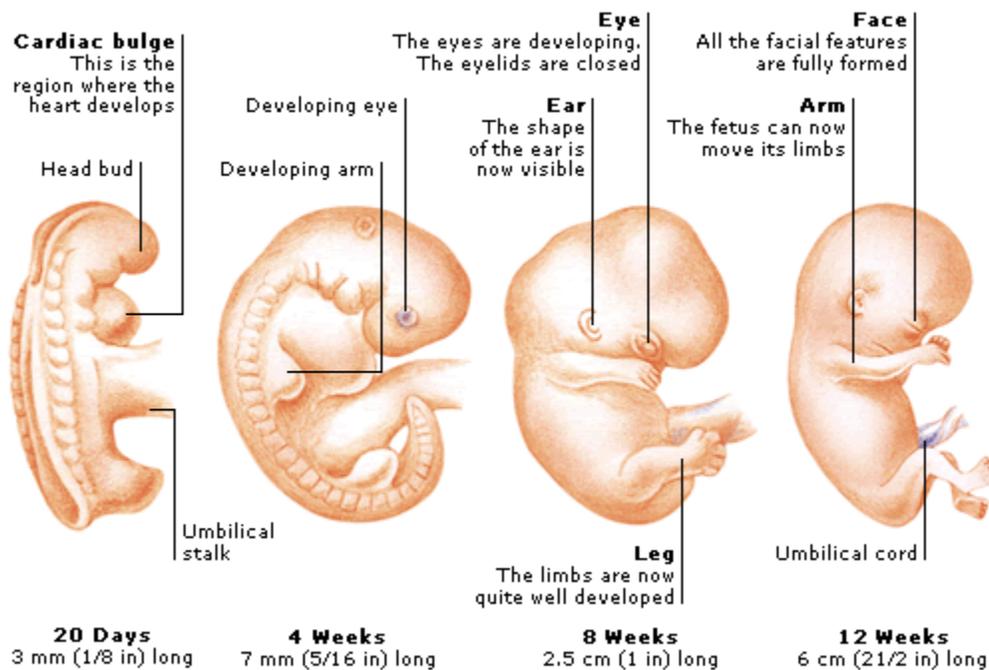

What is in those tanks is kept cold or frozen.

Who is putting dna and aborted baby tissue in our food? BIG CORPORATIONS. Who makes the decisions in Big Corporations? The elite do and what we know about them is that they are openly taking orders from aliens/demons and they flow along with their agenda. Don't forget our government openly made treaties with the aliens and have worked to keep it secret from the general population. The government is not who is in power, but the aliens and next is the Vatican/Jesuits then the secret societies of which all have pledged allegiance to lucifer. The big corporations don't get to be successful unless they join their team. Remember we have a shadow government, and that's the one that is really in control.

Psalm 139:15-16 – My substance was not hid from You, when I was made in secret, and curiously wrought in the lowest parts of the earth. Your eyes did see my substance, yet being unperfect; and in Your book all my members were written, which in continuance were fashioned (what days they should be fashioned), when as yet there was none of them.

God knew us before He ever created us. He recorded in His book all of the parts of who we are and

knew what days each part of us would be fashioned. To me this speaks of our DNA.

BLOOD SPOTS

Massachusetts began the original newborn screening program back in 1963 with a test for PKU.

If you have recently had a baby in the U.S. you are familiar with your baby having to go through this horrible procedure.

Though few babies were found to have the condition, the benefit of an early diagnosis was so great that other states soon instituted screening programs. Once they'd adopted the practice, states expanded their scope and began testing for more conditions. Ten years ago, 46 states were screening for just six conditions; now all 50 states and the District of Columbia routinely screen newborns for at least 30 genetic conditions, with some states testing for nearly twice that number. Though each state runs its own program, they all begin by collecting a blood spot from the heel of a newborn infant. The sample is analyzed; results are returned. Commonly, the screening program is first mentioned when a mother has checked into the hospital for delivery, and, generally, the programs are mandatory under state law.

In most states, blood spots are transferred to

long-term-storage banks run by state departments of health, where they are retained for at least a couple of years. But in 12 states, samples are kept in a biobank for 21 years or longer. Mrs. Elyshea is a nurse and she is the one who brought this to my attention and here in the state of Texas the blood from the PKU tests for newborns is kept for 25 years. That's because, increasingly, **health departments are using—and sharing—the genetic information for research and analysis.** This practice has accelerated since 2009, when the National Institutes of Health (NIH) awarded a contract to the American College of Medical Genetics and Genomics (ACMG) to establish a Newborn Screening Translational Research Network and develop a national repository of newborn DNA "stored by state newborn screening programs and other resources." Meanwhile California, Iowa, Michigan and New York already participate in a virtual repository, **which allows researchers to access data—and in some cases the stored infant blood spots themselves—for their investigations.**

This expansion of the newborn screening programs will continue to create new opportunities for big research ventures. As DNA sequencing becomes cheaper and more accessible,

many predict whole genome sequencing will replace the current blood spot tests. According to ACMG Executive Director Michael S. Watson, the NIH has already awarded research grants to explore the feasibility of integrating whole genome sequencing into newborn screening.

Remember when Donald Marshall said the demons and elite like to get the medical records of school children and clone them so they can have their sick fun with them. Raping and molesting them, scaring them, sacrificing them etc. Ever wonder what type of medical records they could get a hold of in order to be able to do this? Now we know, DNA and Blood are kept on file for our children and really probably all of us in biobanks. They also run the charitable organizations that are just fronts for their purposes:

Red Cross and the Blood banks. They have access to all the blood they need.

Lev. 17:11 – For the life of the flesh is in the blood: and I have given it to you upon the altar to make an atonement for your souls: for it is the blood that maketh an atonement for the soul.

Heb.9:22 – And almost all things are by the law purged with blood; and without shedding of blood is no remission. (of sins)

Heb.10:19 – Having therefore, brethren, boldness to enter into the holiest by the blood of Jesus,

If you have never taken Jesus as your Savior, your prayers are not going before the throne of God.

John 9:31 – Now we know that God heareth not sinners: but if any man be a worshipper of God, and doeth His will, Him he heareth.

Gen.4:10 – And He said, What hast thou done? The voice of thy brother's blood crieth unto Me from the ground.

God hears the blood of the innocent.

Congressional Quarterly columnist Mark Stencel listened to the HFA (House Foreign Affairs) committee hearings and wrote in his March 15, 2009 article, Futurist: Genes Without Borders, that the conference "sounded more like a Hollywood pitch for a sci-fi thriller than a sober discussion of scientific reality... with talk of biotech's potential for creating **supersoldiers, superintelligence and superanimals [that could become] agents of unprecedented lethal force.**"

CLOSING

satan has fooled and deceived those with blinded eyes and hardened hearts into believing he is the creator of this world. He wants to be like God, so he is now continuing to "make" his own seed: hybrids, clones, walk-ins etc. I say make because to create is to "bring something into existence." satan has never created anything – only God has. satan himself was created by Jesus.

Ezek.28:13 - Read

Eph.3:9 – Read

satan wants to dominate and if he can, destroy God's best creation, humans. We were made in God's own image and satan was not.
