

THREE HEARTS CHURCH INDIA UPDATE for JANUARY - MARCH 2018

This is what Pastor Dalbeer and his family see where they live and minister in Musoorie India. This was taken by his oldest son, Sourav. That is a true sky, pure and perfect the way God made it.

Three heart Ministry India vision for 2018 for the development of the village to save the villages from migration.

The some things that make the people to migrate are:-

Generally, migrations are caused by a variety of factors including economic, social and political factors. But, most common factors are:

1. Employment:

Most of the people migrate from rural to urban areas in search of employment. In rural areas, employment opportunities are less due to

limited types of industries but in urban areas, there is a vast scope for employment in industries, trade, transport and services.

2. Education:

There is a substantial lack of educational facilities, especially those of higher education which result in migration of people to the urban areas for this purpose. Many of them settle down in the urban areas for earning a livelihood after completing their education. From this schooling activity the gospel will be more shared in the village so we have planned to start Sunday school in this school so by this the more children of the village will be come to know

These are some of the basic factor which is being seen in the villages and we have done survey in the villages so we have came to know that these are the most effecting factors that are so we have thought to provide a better education in the area and through this the villagers will stop migrating and when the villagers go to study outside the village they bring bad things in the villages so the villagers are very disappointed to see that they young generation are getting destroyed by going into the cities they start doing like drugs, gambling and many more other things. They are not just destroying their life who are in the cities but when they come back to the village and then they bring these kind of Bad habits in the village and after this they also teaches this in the village children too and this effect the society a lot.

Save girl child and give them education and old age people.

So we have think to make the girl of the village so educated and also to show in the villages that how a boy is important the same is the girl because God has created both the same with same abilities and also to teach them girls are more sufficient then boys in every filed or any sector so we have planned to open a school and a center for the girls specially because in the rural mountain village people are having the same thought about the girls that they are just burden in the families of the village so we have planned to basically focused on girl child and we are continue giving

the awareness but as the Lord showed us the vision for this year that we should focused on doing something for the girls of every village in the rural mountain area.

In the village there is only the old age people are left and only the old people are there and ; provide and pensions provided to them and there are not any things provided to them so the older of the village does not have anything to them. So we are finding a way to resolve this problem for the old age people in the rural mountain area.

Sister I want to thank God I have never thought about villager have how are totally worship satin and follows' Hinduism very strongly but our God is power full and He break the heart of the villager to open through our small activity in the village like health camp water catchment awareness program and empower of women and schooling so these kind of ministry work and they showed the love for their community and God seeded them and they have decided and I thank God for providing us a blessing for His ministry in India.

The village of Almas has donated this huge piece of land to the ministry in November of 2017. They want Pastor to build a shelter for the school poor children and orphanage program. Pastor wants to put a Three Heart School here. The land has to be leveled first. Pastor shares: Good quality education will be provided and gospel will be sended to many of the people of the Gharwal and many of Christain value spread from here to other religions community how will be children in our school area non believer they learn sprituial education from our

school and we will be able sowing the seeds to their families also. From this one initiative the poor children and widows will be able to get employment.

The Three Heart School children and their parents and school community and other people of the village celebrated and learned the history of their Republic Day in January. While they were all gathered together they also listened to hear the Word of God.

They thanked the people who came forward to volunteer in the work for the new school and those who help them in the current school work also.

End of February to early March: It is the biggest achievement in the village that we are able to help people to leave their bad habits through the grace of God that people are able to leave smoking. This old man has quit smoking and also quit drinking and we thank God that he made us this much capable that we were able to help this Old man to leave smoking and the all glory goes to God. That this old man has also starting following the truth of Life and God had helped him to quit the bad habit.

Village children are always left alone in the home and they had to stay at their home because the mother of these children has to go to the felids for the work and the children have to stay alone in the homes and they are alone throughout the day.

This is how the children are left alone in the home and we have seen the condition of the children how they have been left in their home small children of 2 or 3 month they have tied with the rope in the home and after seeing this I had tears in my home because how the children have been tied up in their home and they have to leave in the home alone until their mother return from the fields and so we are thinking to start a small program where the village children will be kept for all day and they will be cared throughout the day and we pray to God that He shows us the way to do it and through it we will be able to show the God love in the village and because of it we will be able to share more gospel and the all glory will go to our savior.

I thank all Three Heart congregation for providing us this vehicle and God is using this vehicle in this kind of road and I also thank God for providing me the strength for going in these villages after having operation of My leg even when I am having pain He provides me the strength for going in this kind of Path and I can walk I am very thank full to Him and also to you and all my Three Heart congregation for continue praying for me and my family health because all the strength comes from Him and He is my strength and He is the One Who provides the strength to us.

Pastor Dalbeer and the ministry visiting new villages for a health camp. This health camp was held for four days in March of 2018. L: Village Danda Ki Bali R: Village Fidogi

They found many people were ill from fever, cough, scabies, body pains & other digresses. Their lifestyles are very poor & they have a tradition of bad habits about health, religion and faith.

The villagers are registering for the health camp. These villages are far apart and 227 people were able to come. These villages are in the Himalayan Mountains.

Here is the dr. that volunteered his time for very little in return.

Waiting to see the dr.

Having the health camps is a way to share the good news of the gospel. Pastor Dalbeer and the ministry team listen to the peoples' problems. As they share about health, family and social problems they pray with them and for them.

Pastor Dalbeer, his family and the ministry team thank you all for supporting this great work. They were able to buy some basic medication to help the people and give a small wage to those that worked the medical camp.

Every camp someone come for the dressing & those patients who are having any injury. We try our best to give very good medicine for the people in the villages who are unable to buy it. Three Heart Ministry (MUS) is helping them by giving them this medicine for free to the people and they are very thankful to us.
