

# OUTREACH UPDATE - THREE HEARTS CHURCH INDIA

## UPDATE for JULY with 2018 YEAR END UPDATE

L-R: Sourav holding Shamyra, Pastor Sunita, Pastor Dalbeer, Sachin and Sonali

We thank God for helping us in every way because of his grace and guidance we were able to complete the all work.

The main concept to start this water catchment, poly houses and latrines (toilets) in the rural Himalayan area was to empower the women of the village who are not give priority to in their families so this was to show in the villages that women are the back bones of the family and they should get the priority so through this program.

The other aim for this program was to provide hygiene in the villages because the villager were not used to use latrine and after this a new alliance has been build up in the villages that they should use latrines and this is the greatest achievement in our work by the Grace of God.

The other work we have done is build the poly house in the villages and with this the villagers were able to get more vegetables in the village and this has had great impact to the women of these village because this was because of the village women fellowship group.

Through which we were able to build up the importance between the villages and the villagers that women are having a great impact on the villages who are not be neglected and the women's have importance as same, as men of the community so through these we were able to build the new impact in the villages.

In this awareness meeting we also discussed about the work plan of water catchment and poly house and latrines with the help of these meetings we were able to choose the most needed village member. We had made some charts to explain the villagers how to keep them hygiene and also how to keep their environment clean these were the main agenda of the meeting. The main aim of the project is to keep the women head and with this to provide the empowerment to the village women and this all is been done with the help of Three Heart Ministry (M.U.S) and this has brought a great impact on the village's environment and it is the great success for us that we are a grass root level organization and we had done this great work not only economically, socially but also spiritually, with this the gospel has been shared in the villages and God has work among the society and this is the great success of this pilot project.

## **RAIN CATCHMENT PROGRAM**

## Holding Tank for the rain water

This project was my dream project to build the water on the mountains to provide water in the villages and I thank God for making my dream come true and also to Three Heart Ministry (M.U.S) for bring forward their hand for helping in this vision and for showing their initiative for these rural poor community for developing water in the mountains. Through this the villages will be able to get water supply for next year and then they can utilize these water in their fields for the crops and this is will help to reduce the scarcity of the water in the villages. We are doing this with our fellowship Group and with the help of our fellowship group we are able to do this work easier with more man power which is being used in the mountain to make river from the mountain and I thank God that He is being helping us to do this work for making water in the dry valley of the mountains.

This is how women work in the mountain and dig the holes for catching up the water in the holes and then transferring the water into the main tank and they are being connected through the PVC pipes with each other.

## EDUCATION

Education plays the central role in escaping generational poverty. Unfortunately, many families in poverty consider education a luxury and even those who value it can find it difficult to afford. Three Heart Ministry (MUS) is providing good quality of education in remote area of foot hill Himalayas. Organization is not just running school but also bring importance of education in villager's knowledge. Through the skilful staff organization is helping villagers' children to get better education for their future. Organization helps to village children to get stationary for the year, uniform and nutrition food. At Three Heart Ministry (M.U S) Organization, we strive for excellence in all we do for we know that our effort is not void. Nevertheless, it sets the standard and example for the students, women, families, and communities to persevere and strive to do their very best in all they set out to accomplish. This in time will result in dedicated, persistent, and diligent workers of the future today. Therefore, this also runs over into our technique of teaching and quality of education we provide at Almas Village School.

Our focus and vision at Three Heart Ministry (M.U.S) Program is to provide and establish good quality education as well as the needed supplies and vigor of producing properly effective and respectable leaders for tomorrow. We believe the next generation has the option and opportunity to change the future for good, if they are taught the vital distinction between right and wrong and how their choices and actions will either build up or destroy the work of our ancestors. Therefore, we strive to prepare and equip students for today's future with new rising technologies that help better the lives of the students and the surrounding communities in the English Medium. We will continue providing good quality education to the remote villages of Uttarakhand.

Due to our vision School are distinguished from other schools in the region by the fact that we are an English Medium school rather than Hindi Medium. In providing the English Medium the children are better prepared and equipped for greater opportunities in the future that lead to a more prosperous and beneficial life for the children and their families. In addition, Three Heart Ministry (M.U S) Organization helps the children and their parents with their financial burden by providing them new uniforms and sponsoring selected children's education. Three Heart Ministry (M.U S) Organization continues to prepare the next generation to be qualified to meet the needs of the current changing society in India, as it grows into a more prosperous nation, beginning in the children's lives and their education.

Current Status: As all of we know, in this time everybody wants to send their children in English medium school, even though they are villagers but their dream to send their children in English medium school. It was a big challenge for us to run English medium schools in mountain remote area but after very hard work and with committed teacher those really wants to help in remote area, Now the problem is, villager doesn't have that much income to fulfill the English medium expenses, our organization is helping them in that area and also encouraging them to support their children in their education and suggest them to pay nominal academic fee and some portion of books expenses. We trying to make our classes' smart classes, conducting computer classes and other additional education and introducing them with modern academic system.

## WOMEN EMPOWERMENT

Life is very difficult for women in our target areas, especially in Rural Himalayan mountainous village ranges. Therefore, these women are very limited in what they are able to do and the opportunities given to them. This is because of the lack of resources available to them and the opportunities given to them for providing for their families. Most women from remote rural areas are in the field by day farming and return back home in the evening to prepare food for their families. This in time creates a dilemma where the women are limited by their daily regimen and therefore, are never given the opportunity to grow and learn new skills. At the Three Heart Ministry (M.U.S) Organization we have seen these needs and are introducing these women to income generating programs with sewing and awareness programs for the vitality of the women and their families. As a result, the growth in the opportunities of the community in our target i Village increases as more and more women are empowered by this program. Three Heart Ministry (M.U.S) Organization continues to empower women through the vital skill of learning to sew and the opportunities that encompass that knowledge, in addition to providing awareness programs to inform the women of recent beneficial developments.

Sunita Singh & Joyti a is the head responsible for the Women's Development Programs at Three Heart Ministry (M.U.S) Organization and has been teaching the women in rural villages the important skill and technique of sewing. This sewing training program provides the women in remote villages the resources and training to assist in empowering the women to have the freedom and capability to earn extra income for their families. This enables the women to have the option of accomplishing great skills that will further their lives and their families lives. At Three Heart Ministry (M.U.S) Organization we do not take lightly the

importance of the women's role in society and the household and therefore, believe women should have more opportunities to further their lives through skill set training, such as sewing, and education.

The empowerment of women which helps them to take their own decisions by breaking all personal limitations of the society and family as we are not unknown by the hard life of mountain's women. Their every morning start with heavy burden. Now changing coming in their life since many of the villagers understood the value of education and has been started to send their daughters to school. Organization started to teach villagers women to become a strong hold in their family and important of their roll to improve families' conditions. We are started to teach some skills, which can help them to earn some income for their life and family. Helping girls to get higher education, teaching them their rights, bringing awareness in personal health.

### Rural Development

Rural Development : is the process of improving the quality of life and economic well-being of people living in relatively isolated and sparsely populated areas. Rural development has traditionally centered on the exploitation of land-intensive natural resources such as agriculture and forestry. If really we visit rural area of mountains, it is very heard life for survive. Mostly area still villagers walk couples a hour to get city for their daily needs. If anyone face emergency of medical doesn't have any chance for life. Hardly people are getting income for their families some families are depend over their agriculture, but agriculture is depend on the rain. In this kind of area are lacking of basic needs. Not proper drinking water not sanitation awareness etc. Our Organization working in this

area to bringing development and helping in basic needs awareness. Helping villagers to keep clean their drinking water natural source of water and to take care of damage. Our staff are working to develop villagers in their income generating project and giving ideas and developing green houses and how to grow and what kind of crops can gives them daily income. Society also working to develop sanitation awareness among the rural villagers and with GOVT program through helping them to build toilets Village Development is still a constant exertion (toil) in rural areas, even with the new technologies of today because of the rugged and mountainous terrain. As a result, village development often becomes inhibited and most often repealed, due to the lack of resources that are readily available and the training needed to complete such projects. In addition, agriculture is solely dependent upon rain and therefore, makes agricultural development very difficult and harsh for farmers to harvest produce in these areas. As drought continues in Mussoorie, the way of life and profit for these farmers are affected. Thus, Three Heart Ministry (M.U.S) Organization has begun developing training programs regarding construction of green houses to help maintain productive farming techniques, effective construction of infrastructures for supplies and storage, construction of sanitary toilets, and providing awareness programs in sanitation for produce and disposal. We have already constructed a total of seven greenhouses and 20 toilets thus far.

Training

At Three Heart Ministry (M.U.S) Organization we provide opportunities in training to equip and teach vital skills such as building greenhouses, farming with greenhouses, building sanitary toilets, sewing, and teaching teachers the proper and effective ways of teaching education in the schools, throughout the rural

villages in Uttarakhand. Due to the mountainous ranges and drought, resources for agriculture and village development have been affected; therefore, through these varied training programs, the people in remote villages are given the opportunity to grow and develop new skills and effective techniques to better their lives and their families' lives.

In addition, Three Heart Ministry (M.U.S) provides instruction on operational, stable, and safe construction of toilets for maintaining proper sanitation to prevent diseases. Three Heart Ministry (M.U.S) will continue building more green houses each year to better assist the farmers in their efforts to provide for their families.

Please keep this ministry in India lifted up in prayer. Pray for the water to flow into a river.

Thank you all for your support to this ministry.
