

# CORONAVIRUS – Part Seven: 5G

## DISCLAIMER

Even though I am working to expose the coronavirus “event,” we are not saying that the virus isn’t real. The research I have done leads me to believe it is a bioweapon created in a lab and released in Wuhan probably through mandatory vaccinations laced with animal viruses, nanotechnology and metals. We can’t seem to get accurate data from China or the U.S. on the numbers but from what they have shown us, the numbers are no worse than the yearly flu. In fact, coronavirus is comparable to the common cold or the flu. No reason to have shut down the world at all. For those of you who are awake, you know this was a plan, an agenda to move the world closer to the New World Order. Frequencies play a big part in all of this. So we are now covering 5g.

The truth about the coronavirus, about 5g and frequencies, about vaccines is being censored so hard. Truth is under attack.

**Romans 1:18** - For the wrath of God is revealed from heaven against all ungodliness and unrighteousness of men (wickedness of people), who hold the truth in unrighteousness (who suppress the truth by their wickedness); Because that which may be known of God is manifest in them (or is plain to them); for God hath shewed *it* unto them (for God has made it plain to them).

satan owns the air waves of this world. Think about the media, they are his. So they won’t tell you the truth about 5G or this planned event because satan can’t handle people knowing the truth.

The truth will set you free.

**John 8:31-32** - Then said Jesus to those Jews which believed on Him, If ye continue in My word (hold to My teachings), *then* are ye My disciples indeed; And ye shall know the truth, and the truth shall make you free (set you free).

5G refers to next-generation mobile networks that offer super-fast data speeds that promise to support technologies like driverless cars and virtual reality.

## 5G IS NOT SAFE

### RESEARCH FROM SCIENTIFIC AMERICAN

Credit: Bill Oxford Getty Images

I'm just going to hit on some highlights of some of my research into radio frequency radiation (RFR). There are 250 scientists and medical dr's that have signed the 5G Appeal that calls for an immediate moratorium on the deployment of 5G and demand that our government fund the research needed to adopt biologically based exposure limits that protect our health and safety.

The FCC was basing their limits on some experiments on rats from 1980. They were only considering protecting us from short term heating risks. The evidence of heating is not the only thing that indicates that harm is being done. Even without significant heating, harmful effects are still happening.

\*Please play video – shows amount of heat put out by a cell phone\*(about 1 min.)  
[https://www.youtube.com/watch?v=H0x03jY\\_etE](https://www.youtube.com/watch?v=H0x03jY_etE)

Citing this large body of research, more than 240 scientists who have published peer-reviewed research on the biologic and health effects of nonionizing electromagnetic fields (EMF) signed the International EMF Scientist Appeal, which calls for stronger exposure limits.

“Numerous recent scientific publications have shown that EMF affects living organisms at levels well below most international and national guidelines. Effects

include increased cancer risk, cellular stress, increase in harmful free radicals, genetic damages, structural and functional changes of the reproductive system, learning and memory deficits, neurological disorders, and negative impacts on general well-being in humans. Damage goes well beyond the human race, as there is growing evidence of harmful effects to both plant and animal life.”

The scientists who signed this appeal arguably constitute the majority of experts on the effects of nonionizing radiation. They have published more than 2,000 papers and letters on EMF in professional journals.

The FCC’s RFR exposure limits regulate the intensity of exposure, taking into account the frequency of the carrier waves, but ignore the signaling properties of the RFR. Along with the patterning and duration of exposures, certain characteristics of the signal (e.g., pulsing, polarization) increase the biologic and health impacts of the exposure. New exposure limits are needed which account for these differential effects. Moreover, these limits should be based on a biological effect, not a change in a laboratory rat’s behavior.

**\*\*Ignoring the research, basically the FCC said no changes were warranted at this time.\*\***

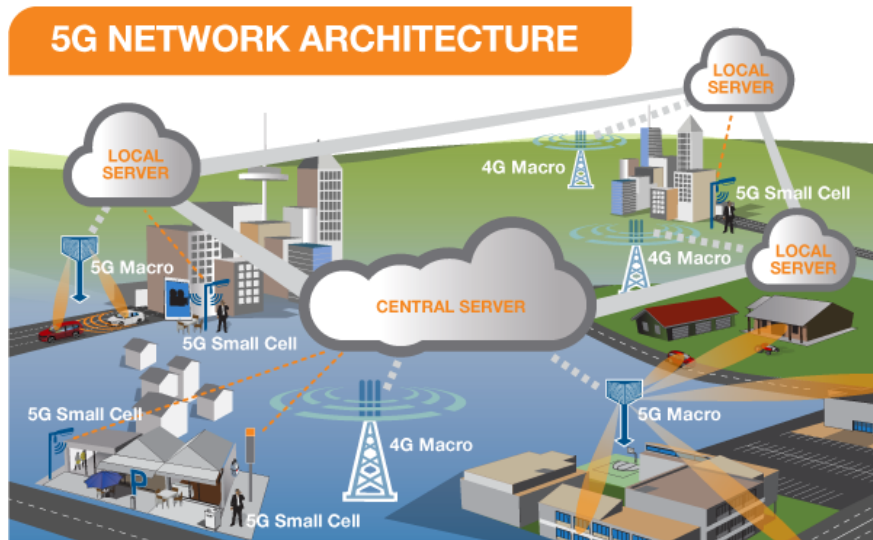

The latest cellular technology, 5G, will employ millimeter waves for the first time in addition to microwaves that have been in use for older cellular technologies, 2G through 4G. Given limited reach, 5G will require cell antennas every 100 to 200 meters, exposing many people to millimeter wave radiation.

5G also employs new technologies (e.g., active antennas capable of beamforming; phased arrays; massive multiple inputs and outputs, known as massive MIMO) which pose unique challenges for measuring exposures.

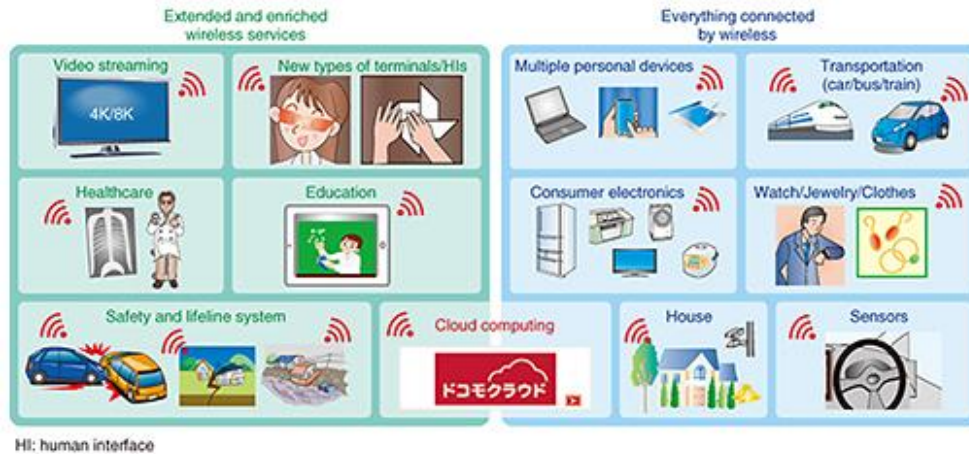

Millimeter waves are mostly absorbed within a few millimeters of human skin and in the surface layers of the cornea. Short-term exposure can have adverse physiological effects in the peripheral nervous system, the immune system and the cardiovascular system. The research suggests that long-term exposure may pose health risks to the skin (e.g., melanoma), the eyes (e.g., ocular melanoma) and the testes (e.g., sterility).

Since 5G is a new technology, there is no research on health effects, so we are “flying blind” to quote a U.S. senator. However, we have considerable evidence about the harmful effects of 2G and 3G. Little is known of the effects of exposure to 4G, a 10-year-old technology, because governments have been remiss in funding this research. Meanwhile, we are seeing increases in certain types of head and neck tumors in tumor registries, which may be at least partially attributable to the proliferation of cell phone radiation. These increases are consistent with results from case-control studies of tumor risk in heavy cell phone users.

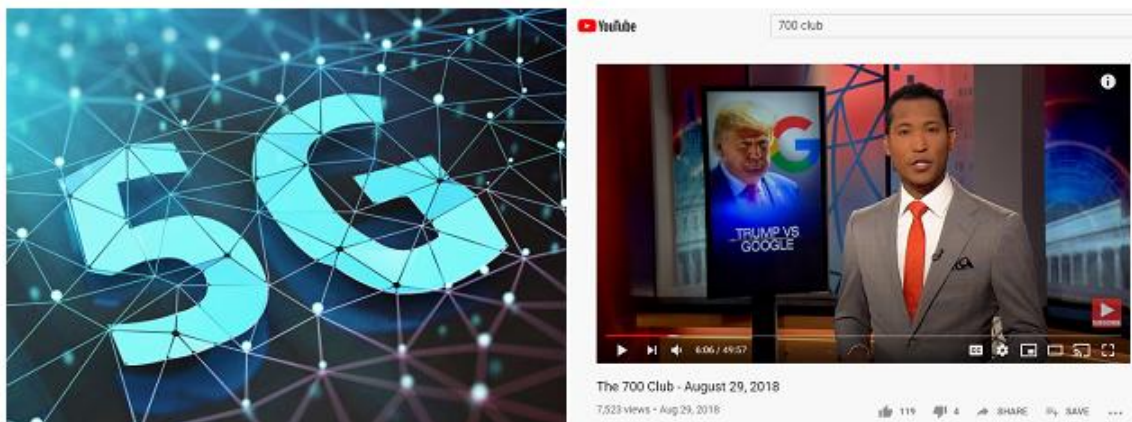

5G will not replace 4G; it will accompany 4G for the near future and possibly over the long term. If there are synergistic effects from simultaneous exposures to multiple types of RFR, our overall risk of harm from RFR may increase substantially. Cancer is not the only risk as there is considerable evidence that RFR causes neurological disorders and reproductive harm, likely due to oxidative stress.

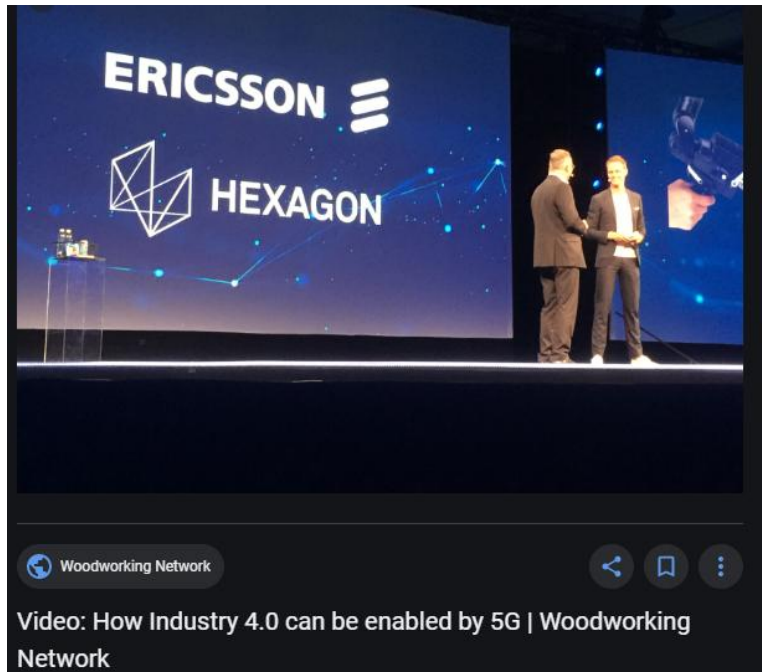

Look at all the stuff that will all be connected into the smart grid, the cloud and another catch phrase is the internet of things. I thought it was interesting to note on the far right it mentions jewelry and even clothes being connected in.

Here is a depiction of the earth being blanketed in the 5g grid. On the right hand side, notice over his right shoulder the same type of patterning. I have already exposed the 700 club with Pat Robertson as a freemason. Everything you see in the shot is placed there on purpose. Seems to be a subtle clue here.

Top: Jentezen Franklin, one of the luciferian televangelists is showing us what's coming and who he serves. A bee hive, hive mind with a bunch of brainless worker bees plugged in to the matrix. Their plan is to plug you into the grid. Notice on the hive behind Franklin it looks like energy and little clouds. Their sets are primed with symbols, colors, numbers and are sending out or casting their spells out on humanity. They work dark magic and send it out through the air waves and onto their congregations.

These two companies will work together to bring you 5g. Hexagon is really telling for a company that wants to cast it's spell on the whole world. The luciferians practice the mystery religion of Babylon. It is based on symbols, colors, numbers, nature etc. It is the same religion of witches, and freemasons. They are ruling the world with their master, satan, who has granted them their power.

#### **At least 10,000 5G Antennas Installed in Wuhan Alone**

*What has not been apparent in the news reports is the fact that China in its rush to take the lead in the 5G race, had by the end of 2019 (and mostly within the last several months leading up to the COVID-19 outbreak) installed 130,000 5G antennas throughout the country, 31 with at least 10,000 antennas installed in Wuhan alone. 32 (As a comparison, the USA only has approximately 10,000 5G antennas presently installed throughout the whole country.)*

At least 10,000 5G antennas installed in Wuhan alone.

What has been apparent in the news reports is the fact that China in its rush to take the lead in the 5G race, had by the end of 2019 (and mostly within the last several months leading up to the COVID-19 outbreak) installed 130,000 5G antennas throughout the country, with at least 10,000 antennas installed in Wuhan alone. I believe 5g and other frequencies played a part in this event at least initially in Wuhan. But what I have seen since the kick-off has been a lot of number manipulation and propaganda. I really think most of this has just been a massive psyop because people believe anything on tv and the luciferians know this. They know they can say anything and not be questioned by the majority of the people. Look at the column where I drew the green box. That column is the number of deaths per 1 million in population. I cut and pasted onto this chart so that you could see some of the numbers of countries that don't even have 5g. Brazil, Canada, Belgium and Peru don't even have 5G yet. So we can't just say it was all because of 5G.

The radiation from our technology and innovative toys is not healthy for us. They are not going to back down but just keep going forward or up. They know about the weaponized ranges and what they can do to us.

## Verizon 5G Ultra Wideband | Now in Parts Of Select Cities

More capacity for more devices in the same place at the same time. Learn more at Verizon. Get the most out of Verizon's **5G** Ultra Wideband. **Now** available in parts of select cities. Flash Loading. Real Response. Instant View. Responsive Gaming. True Chat.

**The Top 10 Countries: 5G Leaderboard**

**Question: Which Country Uses 7g Network?**

7G is already up and running too. The countries already on 7G are: Norway, Sweden, Hong Kong, Switzerland, Finland, Singapore and Japan. India is testing 7G and I saw some information that said they had it in some areas already. The maps are not all up to date and so you have to dig around to find some of this information.

## Research Info. on Pakistan

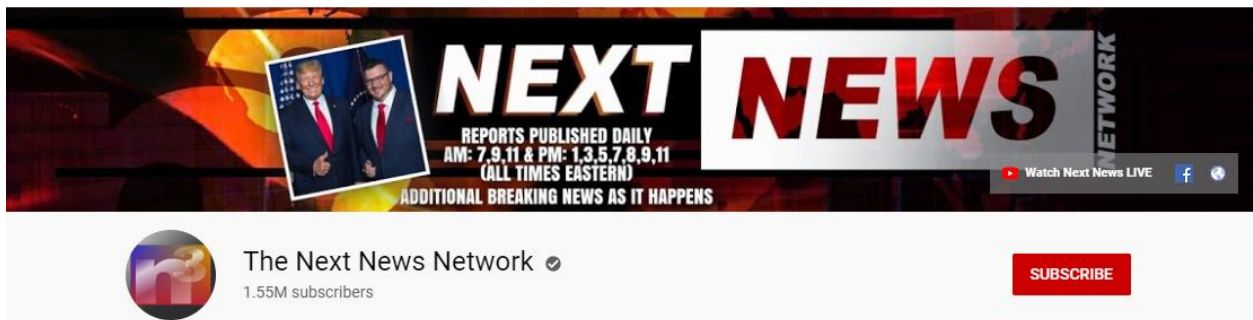

Secondly, 5G **technology** would allow better control of devices such as drones, industrial robots, self-driven cars, and safety systems. With such technology accessible to the general public, even remote medical procedures and treatments will become possible, and healthcare sector will be revolutionized.

Lastly, 5G would contribute towards faster internet speeds and greater bandwidth to enable a truly connected world. We're moving towards a world where cables and modems will become non-existent. High speed media coverage would be possible without the need for broadcast vans.

Pakistan doesn't have 5G yet and here was some information I found written for them: Secondly, 5G technology would allow better control of devices such as drones, industrial robots, self-driven cars, and safety systems. With such technology accessible to the general public, even remote medical procedures and treatments will become possible, and healthcare sector will be revolutionized.

Lastly, 5G would contribute towards faster internet speeds and greater bandwidth to enable a truly connected world. We're moving towards a world where cables and modems will become non-existent. High speed media coverage would be possible without the need for broadcast vans.

Thank you Ms. Tommie for sharing the following video:

This is a skill freemasonic channel pretending to be one of the good guys. Notice his picture with Trump and the hand in the jacket with a thumb up. Freemasons.

## **AGAIN 5G AT THE HIGHER GHZ IS HAZARDOUS TO OUR HEALTH**

Short haul, high-density deployments of wireless communications devices are required in metropolitan areas and business parks throughout the United States. Most often, office buildings though not physically linked to the fiber backbone are within one half mile of a local fiber trunk. Wireless communication devices operating at higher frequencies, such as 60GHz, allow businesses to link to the fiber easily, without the cost and time delays associated with physical fiber installation.

Due to the increased bandwidth demands and the scarcity of microwave frequency allocations, the wireless communications industry is beginning to focus on higher, previously unallocated portions of the spectrum in the millimeter wave frequencies from 40GHz to 300GHz. Due to the high levels of atmospheric RF energy absorption, the millimeter wave region of the RF spectrum is not usable in long haul, wireless communications segments. However, for short haul, "last mile" segments, the expanded RF data bandwidth available in the millimeter wave region makes it ideal for interference free, fiber speed connectivity.

Short haul, high-density deployments of wireless communications devices are required in metropolitan areas and business parks throughout the U.S. Most often, office buildings though not physically linked to the fiber backbone are within one half mile of a local fiber trunk. \*\*\*\*\*Wireless communication devices operating at higher frequencies, such as 60GHz, allow businesses to link to the fiber easily, without the cost and time delays associated with physical fiber installation.\*\*\*\*\* Do you think they will use the 5G at the 60 GHz range? You

better believe they will. They aren't going to take the time and spend the money to lay all of that fiber when they can just go around that by cranking it up to 60 GHz. \*\*\*\*\*

Due to the increased bandwidth demands and the scarcity of microwave frequency allocations, the wireless communications industry is beginning to focus on higher, previously unallocated portions of the spectrum in the millimeter wave frequencies from 40GHz to 300GHz. Due to the high levels of atmospheric RF energy absorption, the millimeter wave region of the RF spectrum is not usable in long haul, wireless communications segments. However, for short haul, "last mile" segments, the expanded RF data bandwidth available in the millimeter wave region makes it ideal for interference free, fiber speed connectivity.

**Figure 1** illustrates the atmospheric absorption for millimeter wave frequencies.

At the millimeter wave frequency of 60GHz, the absorption is very high, with 98 percent of the transmitted energy absorbed by atmospheric oxygen. While oxygen absorption at 60GHz severely limits range, it also eliminates interference between same frequency terminals.

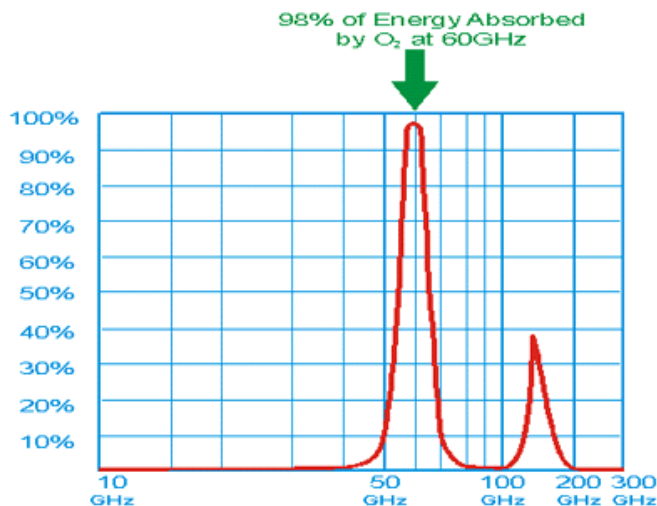

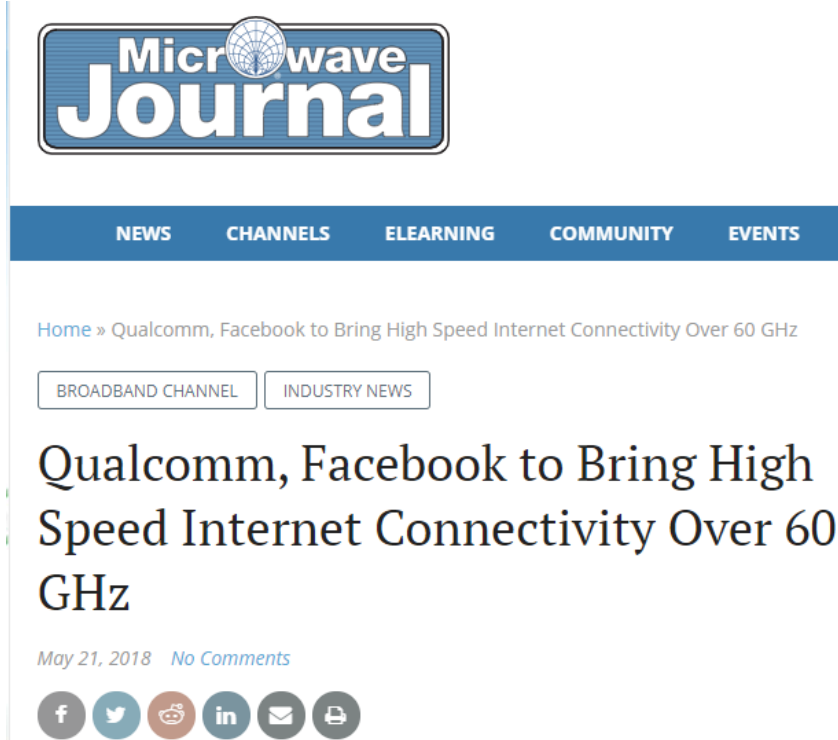

Figure 1 illustrates the atmospheric absorption for millimeter wave frequencies. At the millimeter wave frequency of 60 GHz, the absorption is very high, with 98 percent of the transmitted energy absorbed by atmospheric oxygen. While oxygen absorption at 60GHz severely limits range, it also eliminates interference between same frequency terminals.

Due to the unique characteristics of the 60GHz millimeter wave region and the raw bandwidth available, wireless communication at 60GHz offers a reliable "last mile" alternative to installing physical fiber. 60GHz communications systems can be used for a variety of applications, including metropolitan area networks, campus networks, network backbones, network branch links, temporary emergency restoration and local access.

Due to the unique characteristics of the 60GHz millimeter wave region and the raw bandwidth available, wireless communication at 60GHz offers a reliable "last mile" alternative to installing physical fiber. 60GHz communications systems can be used for a variety of applications, including metropolitan area networks, campus networks, network backbones, network branch links, temporary emergency restoration and local access.

Would they use 5G in the danger zone of 60 GHz?

## Qualcomm, Facebook to Bring High Speed Internet Connectivity Over 60 GHz

May 21, 2018 No Comments

f t y in e p

\*Please play from 54:28 to 57:24 Dr. Frank Springob DC talks about comparing what happens with people's blood cells when they stood in front of analog meters and then stood in front of a smart meter. He said every time the human energy field was obliterated when standing in front of the smart meter. He said he

measured 30 different people and used darkfield microscopy. They stood in front of each meter for 2 minutes and only 1 foot away. With the analog there was no significant change. But with the smart meter: In the first person the cell walls were broken and there was degradation to the cells. The cells exhibited micoplasma mutation. In the second person's cells the degradation made what is called bottle cap formation, that is known to happen when there is oxidation or exposure to free radicals. The third person had to be pulled away from the meter after 45 seconds because she complained about an increasingly severe headache. Her red blood cells began to stack up, which makes it difficult for the blood to deliver oxygen to the tissues. Every single person is affected by radio frequency even if they don't realize it or complain about it.\*(about 3 min's)

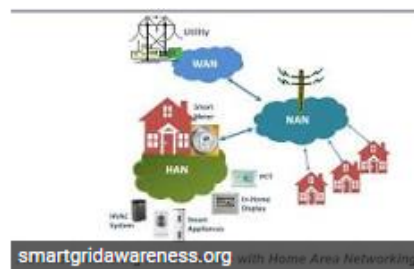

<https://www.youtube.com/watch?v=B5y4Nhn6J5M>

## 902 MHz

When a **smart meter** contains an RF transmitter: The **frequency** of operation is typically in the 902 MHz and 2.4 GHz bands. Power output is typically 1 watt in the 902 MHz band and much less in the 2.4 GHz band. The intended range of a transmitter in a **smart meter** is typically very localized.

[www.arrl.org](http://www.arrl.org) › smart-meters

[Smart Meters - ARRL](#)

When a smart meter contains an RF transmitter: The frequency of operation is typically in the 902 MHz and 2.4 GHz bands. Power output is typically 1 watt in the 902 MHz band and much less in the 2.4 GHz band. The intended range of a transmitter in a smart meter is typically very localized.

This is supposedly much lower than the 60 GHz range and yet look at the damage it was causing. Remember Dr. Thomas Cowan said 5G in the 60 GHz range is a

water destructuring device. These frequencies are lowering our immunity and making it easier for us to get sick and they profit off of that too.

## **CLOSING**

**Proverbs 29:2** - When the righteous are in authority, the people rejoice: but when the wicked beareth rule, the people mourn (groan).

Aren't we groaning and mourning because of the wicked leaders of this world? We sure are.

**2 Cor.2:11** – Lest Satan should get an advantage of us (in order that satan might not outwit us): for we are not ignorant of his devices (for we are not unaware of his schemes).

**Luke 10:17-20** - And the seventy (or 72) returned again with joy, saying, Lord, even the devils (demons) are subject unto us through thy name (in Your name). And He said unto them, I beheld satan as lightning fall from heaven (I saw satan fall like lightning from heaven). Behold, I give unto you power (authority) to tread on serpents and scorpions, and over all the power of the enemy (to overcome all the power of the enemy): and nothing shall by any means hurt you. Notwithstanding in this rejoice not, that the spirits are subject unto you (submit to you); but rather rejoice, because your names are written in heaven.

You have the power in Jesus' name to bind and cast out. To stand against this wickedness. Pray for your brothers and sisters in Christ all around this world. Keep the faith and trust Jesus, He is greater than all of this.
