I covered vaccines from part 13 through part 21 of this teaching series. My sermon notes for those parts have links to two very informative videos on vaccines if you are not awake to the vaccine agenda yet.

Dilbert cartoon for August 22, 2020: Our 5G test accidentally opened a doorway to the demon world. Let's keep that to ourselves so we don't spook the public. Don't tell me. Tell Darryll. Hey, nice world you have here. Thanks David King for sharing that with us. They love that they can put truth out like this and most are not catching on. 5G was at the forefront when this whole coronavirus agenda kicked off in China.

They openly show us what they are doing. They have a statue of Shiva (shiv) in front of CERN with a dedication plaque on it. This is a hindu god of destruction. One of satan's false trinity. Look at the 6's in the logo of CERN and for Google. They are showing us who they serve. 666 is the number of the sun god – lucifer.

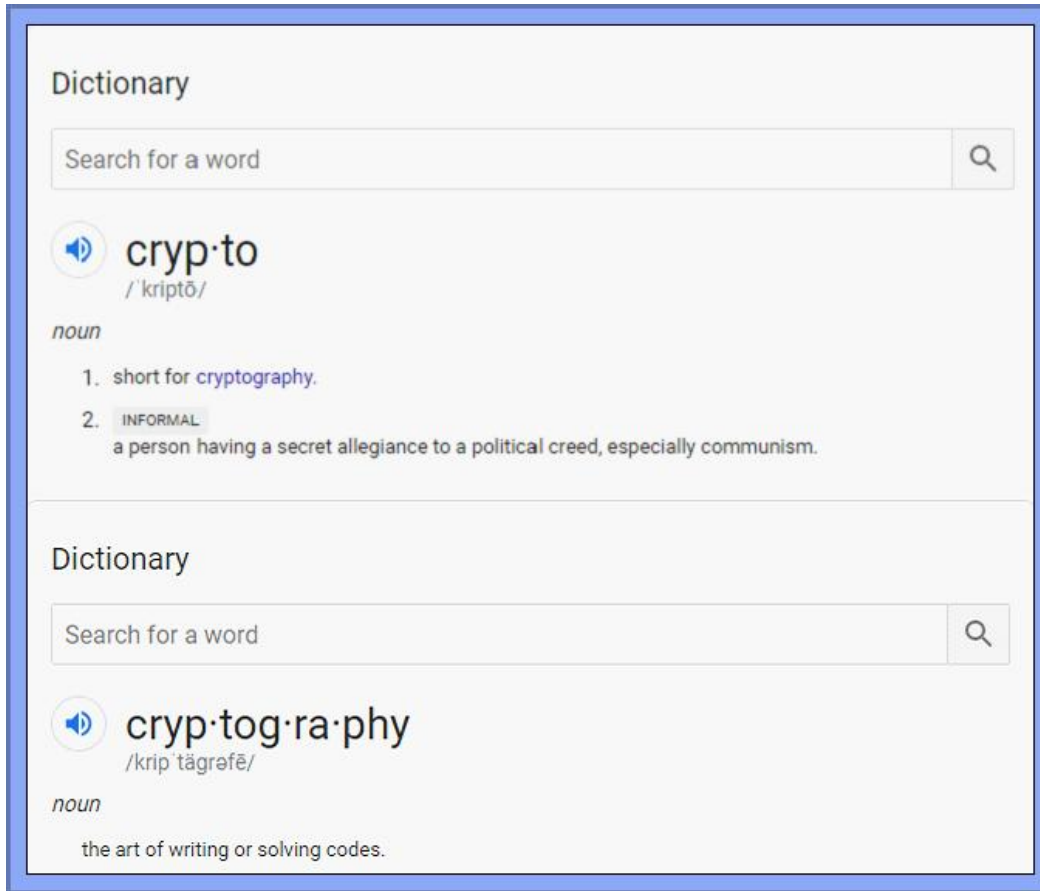

Revelation 9:1-2 – And the fifth angel sounded, and I saw a star fall from heaven unto the earth: and to him was given the key of the bottomless pit. And he opened the bottomless pit; and there arose a smoke out of the pit, as the smoke of a great furnace; and the sun and the air were darkened by reason of the smoke of the pit.

Yes, they are trying continuously to bring in more demons, evil spirits, fallen angels into this realm. They are trying to open the pit of hell and let it loose on this world. Here we see that at some point God is going to allow him to totally release the pits of hell onto this earth. This world has rejected Christ more and more and God is giving it over to what it wants. When you want your sin more than God He will turn you over to it.

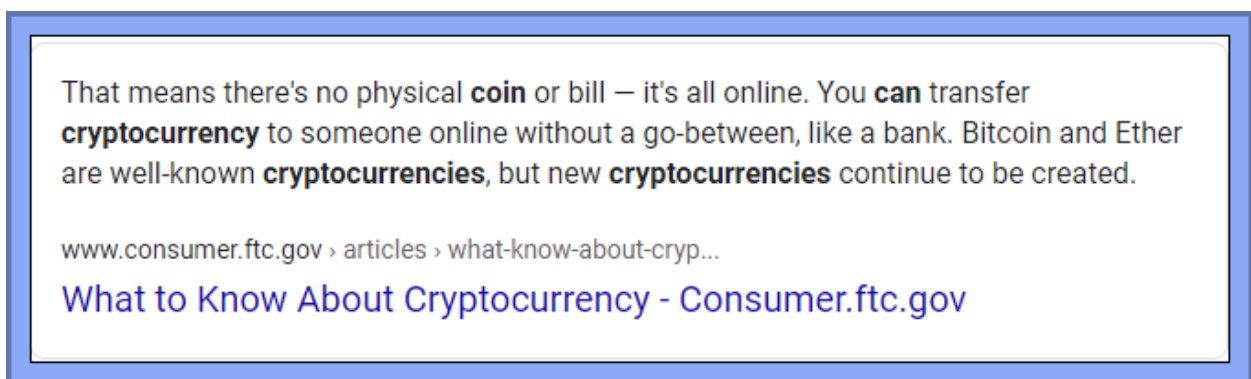

God Of All Things (GOAT)

L: Obama on the cover of Newsweek R: Shiva – hindu god of destruction. They always honor their gods and those who serve him. They love to mock God openly.

Crypto – short for cryptography. A person having a secret allegiance to a political creed, especially communism. The second definition seems to be getting to the point. Cryptography – the art of writing or solving codes.

Cryptocurrency – there's no physical coin or bill – it's all online. You can transfer cryptocurrency to someone online without a go-between, like a bank. Bitcoin and Ether are well-known cryptocurrencies, but new cryptocurrencies continue to be created.

Microsoft Patents New Cryptocurrency System Using Body Activity Data

No surprise that we find Bill Gates' company Microsoft at the center of this.

Microsoft has patented a cryptocurrency mining system that leverages human activities, including brain waves and body heat, when performing online tasks such as using search engines, chatbots, and reading ads. "A user can solve the computationally difficult problem unconsciously," the patent reads.

Microsoft has patented a "cryptocurrency system using body activity data" with the World Intellectual Property Organization (WIPO), the agency of the United Nations responsible for treaties involving copyright, patent, and trademark laws.

Microsoft has patented a “cryptocurrency system using body activity data” with the World Intellectual Property Organization (WIPO), the agency of the United Nations responsible for treaties involving copyright, patent, and trademark laws. Do you think they call it WIPO for nothing? Remember how the movies say they can wipe your mind? As in MK Ultra programming and experiments that they have done.

Microsoft patents a cryptocurrency system leveraging different types of sensors to “measure or sense body activity or scan human body,” such as heart rate monitors, thermal sensors, and optical sensors.

The idea of mining cryptocurrencies using human body heat has previously been explored by other organizations. For example, Manuel Beltrán, founder of the Dutch Institute of Human Obsolescence, set up an experiment in 2018 to mine cryptocurrencies with a special bodysuit that harvested the human body heat into a sustainable energy source. The electricity generated was then fed to a computer to mine cryptocurrencies.

When you have people like Bill Gates and Mark Zuckerberg openly participating in cryptocurrency you have to realize it is part of the luciferic agenda for the NWO, to move to a, cashless society. I don't believe for one minute that it is decentralized. The Rothschilds and their cronies are going to run it just like they run the world banking system.

Adoption of Bitcoin Picking Up Speed in Venezuela, Called “Lifesaving” Currency

Dec.16,2017, Adoption of Bitcoin picking up speed in Venezuela, called “lifesaving” currency. Venezuelans continue to turn to bitcoin for survival, not speculation, as their national currency continues to die.

Bitcoin is now becoming a constant part of many Venezuelans' everyday life.

Whether they're buying food, plane tickets, or even paying employees, Bitcoin is now a common mode of payment for Venezuelans. Frankly, many people in the country rely on cryptocurrencies for survival.

Survival of fittest

Venezuela's hyperinflation has rendered the national currency, the Bolivar, nearly worthless. Thousands of ordinary people have begun turning to the world of cryptocurrency to salvage what little value remains in their savings..

One Venezuelan, John Villar, knows the struggle of having a his national currency become worthless, so he sticks with Bitcoin for all of his transactions. He said that his situation, choosing digital currency is not a matter of politics but of survival. Bitcoin transactions are relatively swift for anyone with a smartphone: Websites like LocalBitcoin and Colibit function as exchanges where Venezuelans can buy and sell bitcoins using a local bank account.

They broke Venezuela down, caused hyper inflation and drove the people to cryptocurrency. If this is even true. They have their methods for getting what they want.

He brings out information about Operation Dark Winter where they showed us their plans for this pandemic back in 2001./ We are seeing all economic activity except for the internet, Fedex and Amazon being mostly shut down. They wiped out all small businesses and the BIG BUSINESSES are being BAILED out. By printing up all of this money, more than we had in circulation they are starting up hyper inflation. *(about 5 min's)

"We're about to go into a dark winter": Biden says Trump has no plan for coronavirus

BY CAITLIN O'KANE

OCTOBER 23, 2020 / 8:14 AM / CBS NEWS

CBS: "We're about to go into a dark winter": Biden says Trump has no plan for coronavirus. They love to agitate the ones who are awake. They think it is all fun and games but God will have the last laugh.

Notice what he was saying about hyperinflation. That's what they did to Venezuela when they drove them to cryptocurrency. They just print and infuse more paper money into the system all the time. There is a method to their madness. They are methodically moving step by step carrying out their plans for a New World Order. Meaning one government for the whole world under their control. They are luciferians.

This next video is straight illuminati.

*Please play from 0 to 8:56 and from The show "Rising: from March 23, 2020. She begins by discussing how high unemployment can go because of the coronavirus. The president says the government will be helping hotels, air travel industry and cruise ship industry out with bail outs. Then he says they are going to help small businesses out but it is complicated. Talks about how millions are filing for unemployment and losing their connection to their employer provided health insurance. Mentions that our healthcare system being designed around profit instead of care might not have been such a good idea after all. He says we had food rationing in this country back at WWII and we had nationalization of this country. He goes on to say we can have those type of things imposed again and

then we can go back to the way we want to live with major modifications on the way that we have lived even to what we've seen before. He said there's only one way we save commerce in this country and that is to have universal testing immediately. And the government has to be empowered with a lot of things that we're all really gonna hate. Like forcibly being able to confine you to your home. Fining you large sums of money if you try and violate quarantine. In Taiwan they are using GPS locating tractors to make sure people are not leaving their houses.*(about 9 min's)

<https://www.youtube.com/watch?v=ZF3fb5i9D6U>

Look at the name of the show and look at the initiation name of the lady: Krystal Ball. The show being called "Rising" is just like the phoenix that they say rises from the ashes and also the sun; both are for the sun god lucifer. Her last name Ball for the sun god and then look at that, they paired a witchcraft item with it: Krystal Ball. So they are pretending that we should give up our freedoms temporarily so that we can get this health crisis under control. Then remove the restrictions. They are only telling us more of what they want to do and they do not intend to remove or lift those restrictions. They are steadily locking their plan into place. Notice they mentioned they thought it would be a good thing to forcibly confine us to our homes and track us and fine us huge sums of money. None of that is ok. And the divide between people who are awake to all of this and those that believe the tv is growing and they know it.

Shout out to youtuber Joleen Skipper, she was sharing links about the nanotechnology, the vaccine and cryptocurrency and the chemtrails they spray on us.

Harvard Magazine January – February 2011 had an article “Virus-Sized Transistors” by Jonathan Shaw

Hyman professor of chemistry Charles Lieber has created a transistor so small it can be used to penetrate cell membranes and probe their interiors, without disrupting function. The transistor (yellow) sits near the bend in a hairpin-shaped, lipid-coated silicon nanowire. Its scale is similar to that of intra-cellular structures such as organelles (pink and blue orbs) and actin filaments (pink strand).

B.Tian and C.M. Lieber, Harvard University

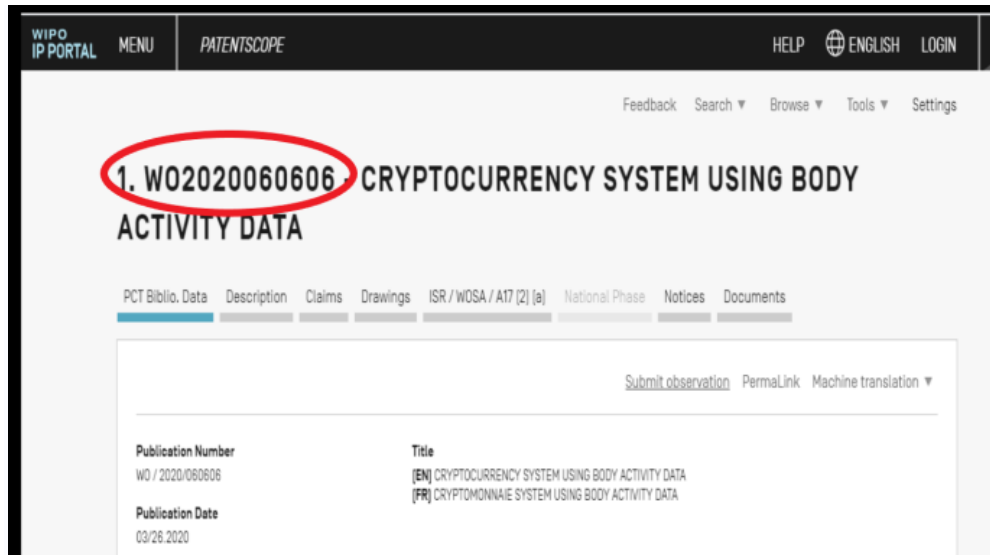

IMAGINE BEING ABLE to signal an immune cell to generate antibodies that would fight bacteria or even cancer. That fictional possibility is now a step closer to reality with the development of a bio-compatible transistor the size of a virus. Hyman professor of chemistry Charles Lieber and his colleagues used nanowires

to create a transistor so small that it can be used to enter and probe cells without disrupting the intracellular machinery. These nanoscale semiconductor switches could even be used to enable two-way communication with individual cells. This innovation is important, Lieber explains, because it indicates that when a man-made structure is as small as a virus or bacteria, it can behave the way biological structures do. And because a transistor also allows the application of a voltage pulse, such devices might one day provide hybrid biological-digital computation, or deep-brain stimulation for Parkinson's patients, or serve as an interface for a prosthetic that requires information processing at the point where it attaches to its owner.

“Digital electronics are so powerful that they dominate our daily lives,” Lieber points out. “When scaled down, the difference between digital and living systems blurs, so that you have an opportunity to do things that sound like science fiction—things that people have only dreamed about.”

Remember, things they told us were fiction are actually a reality. They have known this all along but we haven't. Virus sized transmitters.....

Abstract [EN]
Human body activity associated with a task provided to a user may be used in a mining process of a cryptocurrency system. A server may provide a task to a device of a user which is communicatively coupled to the server. A sensor communicatively coupled to or comprised in the device of the user may sense body activity of the user. Body activity data may be generated based on the sensed body activity of the user. The cryptocurrency system communicatively coupled to the device of the user may verify if the body activity data satisfies one or more conditions set by the cryptocurrency system, and award cryptocurrency to the user whose body activity data is verified.

Could the nanotechnology contained in the vaccines be used in conjunction with the crypto currency? Remember it is all about control. They want a chip in you one way or another.

Where they have abstract and the information written there they have “En” and en is another name for satan. I brought that out in my last short on Halloween.

Let’s go over Figure 1 shown here: 100 – not sure what it goes to. 110 A maybe a server. 120 Communication Network 130 User Device 140 Sensor 145 Human being 150 Cryptocurrency system All of these components interconnect with each other.

Notice there is a human there standing right beside the sensor connection. The human will connect into this system. Remember our dna is an antenna and it sends and receives data and they know this and have studied it extensively and are already using our dna with the artificial intelligence. AT&T had documents online showing that they were using humans as routers. Ms. Tommie had shared that with me and they have since removed that document. Her brother Joel is in I.T. and he has found many links to information about how they are using our bodies with their systems. They may initially say that you will just wear the sensor on the outside of your body but they are already reading thoughts and sending thoughts through our DNA. Their goal is to have a chip in you to complete the circuit for tighter control.

CLOSING

Ezekiel 7:19 – They shall cast their silver in the streets, and their gold shall be removed (treated as a thing unclean / worthless trash): their silver and their gold shall not be able to deliver them in the day of the wrath of the LORD (their gold shall not be able to save them in the day of the wrath of the Lord): they shall not

satisfy their souls (it will not satisfy their hunger), neither fill their bowels (stomachs): because it is the stumbling block of their iniquity (it is the thing that has caused them to sin).

Some things I failed to mention last week about this passage are: Many times when the Israelites would have enemies coming against them, they would take their money and go hire another nation like Egypt to help them fight their enemies. Instead of depending on God.

So He tells them their silver and gold will not save them because He Himself is going to fight against them. There's no one they could hire or bribe and no amount of money that could win them the victory against God. Even their digital currency will not help them against God.

We were never supposed to be depending on our money to save us but rather to depend on God. And that is still true today. He is supposed to be the One we turn to about everything, all of our decisions in life.

And remember the luciferians do study God's Word so that they can do the opposite of what God says to do. Tim Thompson taught me that. Donald Marshall shared that they sit around the cloning center talking about God's Word and try to figure out how they can make it look like they are fulfilling prophecy. They know the money will be useless so they are pushing for a cashless society.

Just remember what that scripture says because it will happen. If they don't achieve their cashless society this time, they will just keep pushing ahead until they do.
