

CORONAVIRUS Pt 29: TEMPERATURE CHECKS, TEMPERATURE DEVICES

WASHINGTONTIMES.COM

Georgia kicks off chilling door-to-door COVID-19 blood collections

Just remember these people in leadership positions: Government, Military, the Vatican, Jesuits, Freemasons, Bankers are making human sacrifices and eating them and drinking their blood. They get high off of the blood with adrenaline pumped into the bloodstream, along with secretions from the pituitary gland and pineal gland. It helps keep them sane and the ones that aren't reptilians, like the high they get from it as well, they are totally taken over demonically. They love to have their fake events to push for a blood drive so that they have more access to blood and to use for cloning and perverted experiments.

Let's talk about taking our temperature. I was going to discuss some things about the schools today but this particular part, temperature taking, is touching all of us in some way. So we'll start here and I'll get more into the schools next week. Some say this is conditioning for the mark of the beast. Because the mark goes in or on the forehead and in or on the right hand. What about the infrared thermometers and taking those shots to the head every day? Many work places are doing this as well as hospitals and airports etc. But what about children who are still growing and developing and being subjected to this daily and possibly more than once in the day. They may be getting a temperature check at home and then one or two at school.

I did a little research on whether they are safe or not. Scott was explaining about how he uses one to check board designs to make sure the components are not overheating and he was explaining that they only grab the surface temperature. So it isn't penetrating through the very thin fiberglass and reading the opposite side, but only the surface layer. This seems to be the consensus of the research that I read. What about our soft tissues and bones?

What Infrared Thermometers Do

Infrared thermometers work based on a phenomenon called black body radiation. Anything at a temperature above absolute zero has molecules inside of it moving around. The higher the temperature, the faster the molecules move. As they move, the molecules emit infrared radiation--a type of electromagnetic radiation below the visible spectrum of light. As they get hotter, they emit more infrared, and even start to emit visible light. That is why heated metal can glow red or even white. Infrared thermometers detect and measure this radiation.

What Infrared Thermometers Do: Infrared thermometers work based on a phenomenon called black body radiation. Anything at a temperature above absolute zero has molecules inside of it moving around. The higher the temperature, the faster the molecules move. As they move, the molecules emit infrared radiation – a type of electromagnetic radiation below the visible spectrum of light. As they get hotter, they emit more infrared, and even start to emit visible light. That is why heated metal can glow red or even white. Infrared thermometers detect and measure this radiation. We are bodies of energy.

More Information on Infrared Waves

On the electromagnetic radiation spectrum, infrared radiation is that which has a frequency lower than red light. These waves have longer wavelengths than visible light and make up a greater portion of sunlight than visible light and ultraviolet radiation. The heat that you feel on your face on a sunny day is caused by infrared radiation. Even your body emits infrared waves of heat, which are detectable by thermal imaging machines.

MORE INFORMATION ON INFRARED WAVES: On the electromagnetic radiation spectrum, infrared radiation is that which has a frequency lower than red light. These waves have longer wavelengths than visible light and make up a greater portion of sunlight than visible light and ultraviolet radiation. The heat that you

feel on your face on a sunny day is caused by infrared radiation. Even your body emits infrared waves of heat, which are detectable by thermal imaging machines.

Think about the weapons the military use to see bodies inside of buildings or houses etc.

Please play this video. This video shows a temperature scanning system. It can detect masks. Called “Uniview Heat Tracker Series.” It can scan many people in a crowd at the same time. They are advertising this to be used like in airports or places of business etc.(about 2 min’s)

Coronavirus – Automatic Human Body Temperature Scanning

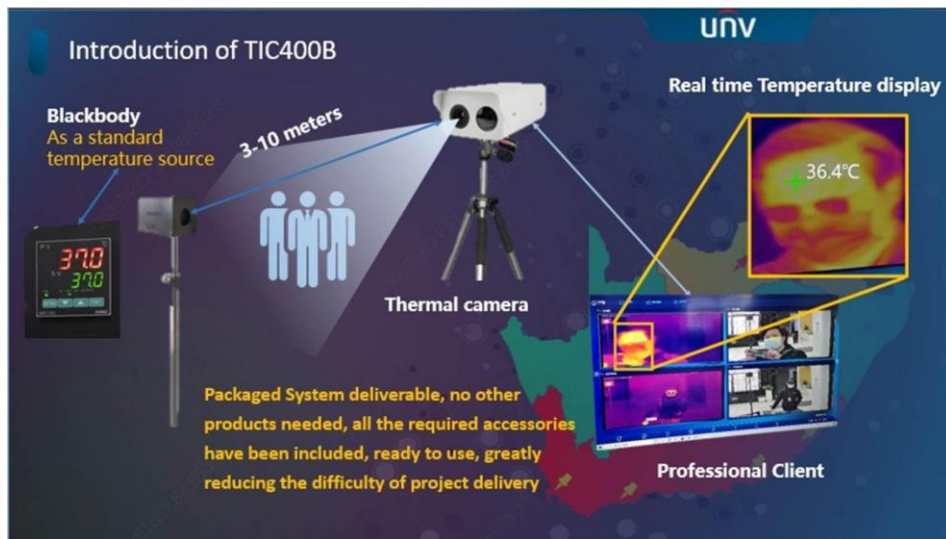

© MARCH 7, 2020

Look at the company logo: TS giving technology wings. There is the triangle for sun worship just like the pyramids of Egypt. And the winged sun disk also from Egypt. Notice the actual name of the company: tech syco (psycho). Very telling.

These companies are not concerned about your health. They only want your money.

Pythagorean Numerology								
1	2	3	4	5	6	7	8	9
A	B	C	D	E	F	G	H	I
J	K	L	M	N	O	P	Q	R
S	T	U	V	W	X	Y	Z	

TS = 21 and remember what their guru satanist Aleister Crowley taught about doing things backward meant they would get more satanic power. 21 backward is 12 and when you add 21 and 12 together you get 33. 33 is the most well known degree of freemasonry and is one of the top ranks in the luciferic pyramid. I heard a guy yesterday saying that the 33 stood for the fallen angels because 1/3 of them fell. Makes sense to me.

This was being marketed already March 7, 2020. Again, another indication of preplanning for their plandemic. This one pictured is called TIC400B. TIC like a tick – the kind that suck your blood. Sounds about right because satan and those that serve him are blood sucking parasites.

Warnings

Do not point at magnetic objects, or those with highly reflective or shiny surfaces.

Do not point the laser through smoke or glass. The infrared thermometer laser gun will measure the temperature of the smoke or glass instead of objects beyond.

Avoid using the infrared thermometer next to areas of extreme heat or cold different from that which you measure. For instance, avoid using the temperature gun in a freezer to determine the temperature of an oven.

This backed up what Scott was talking about. It is going to give a temperature reading from the closest object.

This particular site did say that too much exposure can damage the eyes and the skin. I was surprised to even see that admission.

The most dangerous frequencies of electromagnetic energy are X-rays, gamma rays, ultraviolet light and microwaves. X-rays, gamma rays and UV light can damage living tissues, and microwaves can cook them.

The most dangerous frequencies of electromagnetic energy are X-rays, gamma rays, ultraviolet light and microwaves. X-rays, gamma rays and UV light can damage living tissues, and microwaves can cook them.

Many today will still tell you that x-rays are perfectly safe. Usually the young girls at the dentist office try to say it's safe, they'll even say I give x-rays all day long and I'm still fine. Yeah, give it time and down the road the damage will show up. Sadly many in the medical fields have just believed the lies they have been taught. Then when we question or don't agree we are treated as uneducated morons.

We are already exposed daily to radiations of many forms from our Wi-Fi, phones, watches, smart TV, microwaves, medical scans, airport scans, commercial building scans, and electrical appliances, to name a few. Direct forehead scans are still bothersome for cancer-causing potential, despite claims that they are safe. Repeated and cumulative exposure to any form of radiation is not good since the long-term adverse effects can only be quantified after extensive population-based studies in tens of thousands of people over many years.

The best course of action is to take the temperature on the wrist rather than pointing to the forehead. Once the infrared scanner is appropriately charged and aimed correctly, it will give a comparable temperature reading.

Yours truly,
Dr. Keith D Cummings
Dr. Audrey Baker
Dr. Gerry Baker
Dr. Isaac Davis
Brooklyn, NY, USA

We are already exposed daily to radiations of many forms from our Wi-Fi, phones, watches, smart TV's, microwaves, medical scans, airport scans, commercial building scans, and electrical appliances, to name a few. Direct forehead scans are still bothersome for cancer-causing potential, despite claims that they are safe. Repeated and cumulative exposure to any form of radiation is not good since the long-term adverse effects can only be quantified after extensive population-based studies in tens of thousands of people over many years.

The best course of action is to take the temperature on the wrist rather than pointing to the forehead. Once the infrared scanner is appropriately charged and aimed correctly, it will give a comparable temperature reading. Yours truly, Dr. Keith D. Cummings, Dr. Audrey Baker, Dr. Gerry Baker, Dr. Isaac Davis - Brooklyn, NY, USA

Look around your home and do what you can to eliminate or cut down and protect yourself from these things.

*Please play this video showing a facial recognition and temperature screening system. It can detect masks also. They referred to someone with a temperature as being a blacklisted employee and needing to receive further instructions. This system can be hooked to several units in different locations and used to monitor

and control employees or visitors or those that are given entrance.*(about 3 min's)

<https://www.youtube.com/watch?v= p5eu8INVaE>

They said you can monitor in real time, entry at each device and location. And that you can monitor and have a record of every pass at each location and portal. These type of systems being implemented at airports, businesses, hospitals etc. are for control.

They are pushing the no touch equipment. Remember they made Pastor Erustus get those expensive temperature guns to use at each church branch. Scott's job has a temperature station now where you insert your hand so it can read your temperature. He said it talks and says you are cleared to proceed. He said if you are flagged with a temperature it probably says something like contact human resources or the office. And they had to spend money on the system and have an attendant to sit there with it all day long. Scott said he felt the person was there to make sure you do it.

Please play from 0 to 1:37 – Channel 11 news says that the infrared thermometer is not harming the pineal gland.(about 1.5 min's)

<https://www.youtube.com/watch?v=4bUARQ5Y6Pk>

The mainstream media is a mouthpiece for satan. Are you going to believe the propaganda machine? That dr. is a gynecologist by the way speaking out on a frequency emitting device. She didn't even reference any study at all. And when a study is referenced you have to see who paid for it and what did they stand to profit from the results. Remember the scientist that was speaking out about the smart meter research and how Motorola did not like the results and was telling them what to do to control their answers so they would be favorable to them.

I have spoken on targeting extensively, spoken about how they are using frequencies in a harmful range against us and getting their system in place more and more with the 5g and beyond. And now we are supposed to be ok with them shooting our children in the forehead with these frequencies repeatedly for days on end?

Usually once enough damage is done that's when we start hearing about it. That's when we start hearing about the lawsuits and the harm that was really being done. If we hear about it at all. Think about the damage vaccines do. Dr. Tent said viruses from vaccines can roll around your body for 20 or 30 years before it hits and takes you down. And no one thinks back to that shot that they got that one time or like several every single year.

Cancer Cases Against Johnson & Johnson

Lawsuits claim genital use of talcum powder products led to ovarian cancer.

Here's an example that came to my mind, the Johnson and Johnson baby powder that was been being used by women as talcum powder. Wouldn't you now worry about that as a mother using that on your baby?

CLOSING

You might wonder why I covered this but it is what is happening in our world and it doesn't seem to be going away any time soon. Ms. Christine shared in a youtube comment that there's a book out about their plans to continue this all the way up to 2030.

Our world is being filled with more and more frequency emitting devices. We are bathed in this stuff even when we don't want to be. Think about the systems that they are getting in place with facial recognition and now these temperature check points not to mention x-rays in airports and schools and government buildings. Now they will have these systems zapping you even when you aren't aware of it. Some of us like myself are very sensitive to all of these frequencies. And what

happens is the weaker ones get sick and their health declines. They know this. Every person who is targeted with directed energy weapons knows this. It is by the grace of God that we are still standing. I try to protect myself and my family as much as I can. I seem to be the most heavily targeted in my family. I have what I call power surges in my ears. They ring all day long every day and sometimes one side stops for a split second and to me that is like a power surge when the electricity blinks off and then right back on.

I hope this helps you to think about your children and your loved ones. To really stop and think about all of these frequencies we are being exposed to. Our air waves are so polluted with all of these frequencies. They have filled our environment with nanotechnology and they continue to spray more on us through the chemtrails. It's in our water, the air we breathe and the food we eat. Once it is inside, it self assembles and all it needs to activate is a frequency. It runs a program that is against your God given programming that God put inside of you.

I like the way Aurora Barba, someone who found Tony and has been using his suggested remedies to fight the nano, I like the way she said it:

It's like the body being hijacked and having two different sets of behaviors: one is my own genetic instructions and the other, the nano epigenetic one that takes over and disables my own genetics (?) That's how it feels, I don't know. It's weird, but all I can say is that sometimes I don't recognize my body's reactions (or lack of reaction to remedies) and then when I use that bucket and do STS and probiotics with electrolytes, everything in my body starts acting normal for a while, until I have to repeat the bucket and STS process all over again.

Ephesians 2:2 - Wherein in time past ye walked according to the course of this world, according to the prince of the power of the air (You used to live in sin, just like the rest of the world, obeying the devil, the ruler of the kingdom of the air), the spirit that now worketh in the children of disobedience (He is the spirit at work in the hearts of those who refuse to obey God.):

satan is using his frequencies against this world. The things he still has, he has turned as weapons against us. We have managed this far in the lower frequency

ranges but it doesn't mean all of these frequencies haven't been harming us and making us sicker and sicker all along the way. His surveillance system is getting larger and larger to track us and control us every step of the way.

Matt.24:22 - And except those days should be shortened, there should no flesh be saved (no one would survive): but for the elect's sake those days shall be shortened (for God's chosen ones those days shall be shortened).

Just remember that satan does have power and in these last days his power will be on display more and more and especially when the antichrist and false prophet show up on the scene. But he will never be more powerful than God.

John 10:24-30 - Then came the Jews round about Him, and said unto Him, How long dost Thou make us to doubt (How long will you keep us in suspense)? If Thou be the Christ, tell us plainly. Jesus answered them, I told you, and ye believed not: the works that I do in My Father's name, they bear witness of Me (the works that I do in My Father's name, they are the proof that I am the Christ). But ye believe not, because ye are not of My sheep, as I said unto you. My sheep hear My voice (My sheep listen to My voice), and I know them, and they follow Me: And I give unto them eternal life; and they shall never perish, neither shall any *man* pluck them out of My hand (No one shall pluck them out of My hand). My Father, Who gave *them* Me, is greater than all; and no *man* is able to pluck *them* out of My Father's hand (No one is able to pluck them out of My Father's hand). I and My Father are one. (I and the Father are one).

Most of the translations do not say no man can pluck them out but they say no one can. I like that because it covers not only man but no fallen angels or demons can do it either.

Nothing can separate you from the love of God. He never said it was gonna be easy but He did say He'd be with you through it all. Are you in Jesus' hand?
