

EXPOSING CORONAVIRUS VACCINES – Pt 4: SHILL DOCTORS, GRAPHENE, PEG

Hi Pastor Cherie. I've been keeping up with what scientists are finding in J&J, AstraZeneca, Moderna, Pfizer vaxes. So far countries that have weighed in are: Germany, Japan, Spain (La Quinta Columna), Italy (Corvelva), USA (Dr. Young who has been associated with the Carnicom Institute).

US science team examines 4 CoV vaccines and they found: graphene oxide, aluminum, LNP capsids, parasites (protozoa) and PEG. The protozoa was identified as trypanoma cruzi; it causes Chaga's disease (myocarditis, pericarditis, cardiomyopathy, heart failure) and must be treated quickly or it turns into a chronic and debilitating disease.

She gave a link to some of her research which you will find in the info. box on Bitchute. And in my notes when Scott publishes them on the website. This video will not be published on youtube.

I will state for the record that what I'm noticing seems to be a lot of shill dr's and scientists coming forward with true information or we hope it is anyway. They are all intertwined, and making the same circuits doing interviews on channels that are also shill channels. I think they are just part of the agenda to actually put the truth out there. The luciferians play both sides, they are the bad guys and at the same time, they are the good guys too. Just doing the part that is assigned to them. In order for the luciferians to keep everything stirred up, they also need people to know the truth. And just because they give us truth, we still don't know if everything they are telling us is true either. For example I heard them saying the vaccinated were going to drop like flies in 5 or 6 months. When that did not happen they started stretching the time frame out to 1 or even 2 years now. I think it would be better to say as Dr. Tent has said in the past, that once you have foreign dna and viruses and cancers in your body, it is just a matter of time before it hits your system and takes you down. It could be years or it could be days, everyone is different. And let's not forget God's mercy in this whole thing. They planned this whole thing out, and it is hard to know who to trust. And people are dying from the vaccines, they are being injured and what is reported on MSM doesn't even scratch the surface.

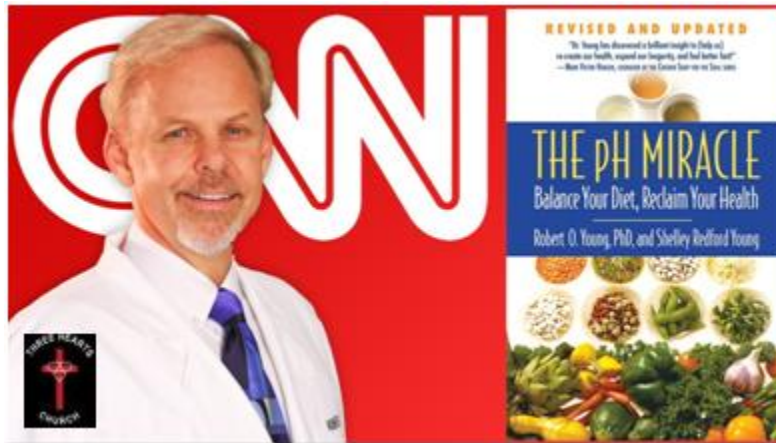

Here's a perfect example of some shills. Project Camelot is a shill channel. They get truth out but they are fed the information. Remember Dr. Judy Mikovits making her rounds on social media, she's not against vaccines. That's a problem right there. So by default, I see this Dr. Robert O. Young making the same circuits and I just feel he's a shill being used to get true information out as well. Hopefully it's all true.

This is another shill channel, TWT in Pythagorean = a 9 which would be a 6 to the luciferians. And her name is an initiation name – Tina Marx. He has an intitated name as well: Robert Oldham Young. Old and young are opposites and ham as in the unclean food that the Jews were not permitted to eat. And the boar, where ham comes from, was the very animal that was said to have killed their sun god Tammuz and then his mother, Easter, commanded their followers to start eating ham on her celebration which is named for her – Easter. That's her name. The orange on the channel background is speaking loudly too. Orange adds up to 33

on the Pythagorean numerology chart – their witchcraft math. Think 33rd degree freemasonry.

He's been promoted on tv and making his rounds on satan's networks. Since satan is the god of this world, no one gets promoted up like this without his stamp of approval. By the way, Dr. Tent was contacted by a local media station that wanted to do an interview with him and he declined it. He knew they do not want the truth and most of his patients said they would probably have just done a hit piece on him anyway. He's actually trying to help his patients. And this Robert Young guy is another dr. promoting alkaline water. Dr. Tent never got on the alkaline water band wagon. I'm not a dr. but I think that is interesting.

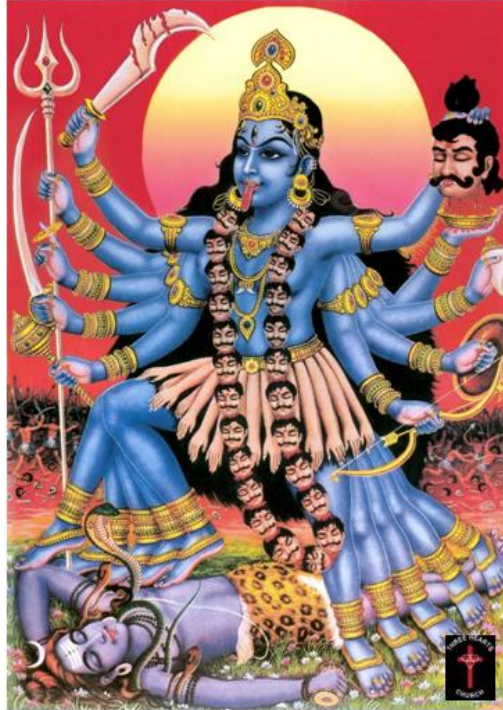

Los Angeles Times

Patrick Swan, one of Kali's attorneys, said his 45-year-old client's oncologist told Kali she has about three or four years to live. She now has stage 4 cancer.

The civil trial in San Diego went roughly seven days, with deliberations lasting less than half a day. The verdict came back Wednesday.

The \$105-million award includes nearly \$90 million for pain and suffering and \$15 million for punitive damages.

Dr. Robert was sued in 2015 and the whole thing is coded if you know what to look for. He was sewed by someone named Kali.

Nice and friendly right? – NOT! She is the Hindu goddess of destruction among other things.

The civil trial in San Diego went roughly seven days, with deliberations lasting less than half a day. The verdict came back Wednesday.

The \$105-million award includes nearly \$90 million for pain and suffering and \$15 million for punitive damages.

Look at this one piece of the article and notice the victim is 45 years old. Add that up and it is a 9, flip it upside down and backward it is a 6. At the bottom 105 million. Add 1 + 5 and you get 6. Then 90 million, drop the zero and flip the 9 and you get another 6. Then 15 million, add 1+5 and you get 6 again. Right there you have 666.

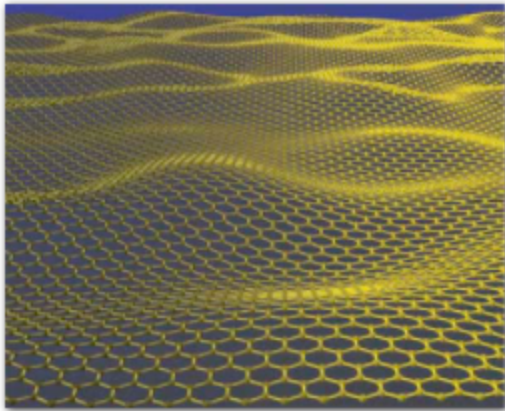

Dr. Young has conveniently named his Ph Miracle Center, where they offer individual and group health retreats, Rancho Del Sol or Ranch of the Sun. They always give their sun god a salute.

On the left is one of their Egyptian sun gods, Osiris. Notice the X on him, and he is always depicted holding the crook and the flail and the way he holds them also makes an X. On the Pythagorean numerology chart an X is a 6. 666 is satan, the ultimate sun god's, number. On the right is Dr. Robert's wife promoting one of their books or eating healthy. She's not just being cute while making that X, she's speaking without saying a word.

Graphene – All You Need to Know

Graphene has emerged as one of the most promising **nanomaterials** because of its unique combination of exceptional properties: it is not only the thinnest but also one of the strongest materials; it conducts heat better than all other materials; it is an excellent conductor of electricity; it is optically transparent, yet so dense that it is impermeable to gases – not even helium, the smallest gas atom, can pass through it.

Graphene – the mother of all graphitic forms. Shown on the left is an artistic impression of a corrugated graphene sheet (Image: Jannik Meyer).

Graphene's unique combination of extraordinary properties offers a fascinating material platform for the development of next-generation technologies in many areas – wearable and superfast electronics, ultrasensitive sensors, multifunctional composites and coatings, membranes, medicine and biotechnology, energy harvesting and storage.

Since its first demonstration in 2004, graphene research has evolved into a vast field with approximately 10,000 scientific papers now being published every year on a wide range of topics.

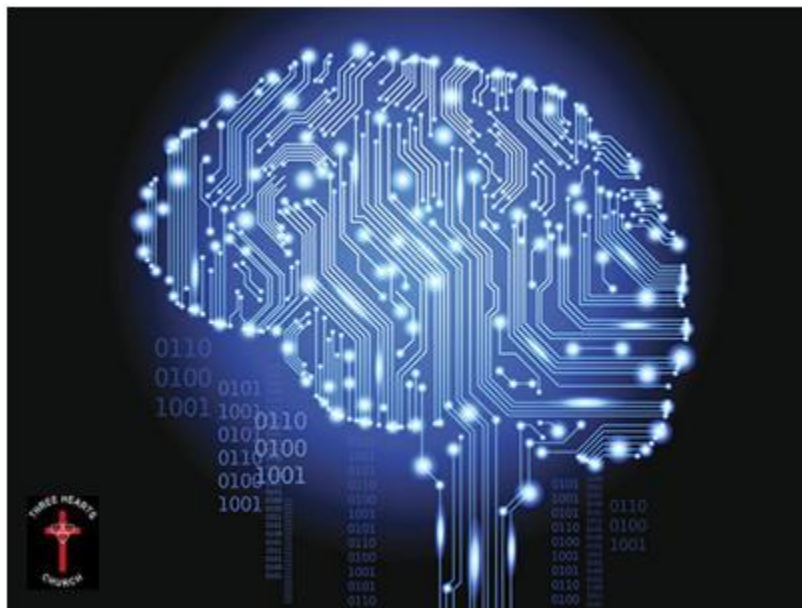

What is graphene?

Graphene is the name for a single layer (monolayer) sheet of carbon atoms that are bonded together in a repeating pattern of hexagons. This sheet is only one atom thick. Monolayers of graphene stacked on top of each other form graphite. Since a typical carbon atom has a diameter of about 0.33 nanometers, there are about 3 million layers of graphene in a 1 mm thick sheet of graphite.

Have you heard of people becoming magnetized after receiving the covid vaccines? If those testimonies are true, the graphene in the shots could have a lot

to do with that. And supposedly people are also glowing after getting the vaccines, if that is true, it seems like they snuck in some of the luciferase with the glowing quantum dots. Supposedly they are installing black lights in some places and there is speculation that it is to see who has been vaccinated. To me that has a lot of flaws in that theory but nonetheless they are putting black lights up in some places. Not sure what that is all about. Seems like if they were going to use them to see who has been vaccinated based on glowing, that the officers would just have black lights at check points. You can just put clothes on and no one would know if you glow or not under these street lights.

To me, finding graphene in the shots goes right along with the neural lace that Elon Musk was talking about. Remember he said in order to help us to catch up to artificial intelligence we needed to inject neural lace into our jugular vein. Because if we don't, he said we'd be like a house cat to artificial intelligence. This graphene is getting closer to what he was talking about. Think of graphene in these shots. Remember we were saying from the beginning that nanotechnology is in these shots. Nanotechnology self assembles once it is in the body. And they have been laying a network of nanotechnology down in us through chemtrails already. Seems like these vaccines are getting the network system set up and solidified in people now. The link to the video where Elon was talking is in the info. box

They are getting their systems in place inside of people without their knowledge. This is all part of Satan's plans to set people up in his system to control their minds. He's already doing this but he wants better control. And as usual, when they are found guilty, they will just say, well the real research was made available. But no one is looking at the real research because they are too busy believing the paid for propaganda that is pushed out as truth and real science, when it isn't.

The Health Concern

The primary concern with PEG compounds is that **ethylene oxide is used in their production in a process called ethoxylation**. This process can cause contamination with ethylene oxide, a chemical associated with multiple kinds of cancer. Mar 26, 2019

#ChemicalCallout: Polyethylene Glycol Compounds (PEGs)

PEG is in the vaccines. I was like, what is PEG. So I went and looked it up. Read above...

First Autopsy of COVID Vaccinated Patient Finds Every Organ of Body Infested with Spike Proteins

Listen to Post Posted by EU Times on Jun 14th, 2021 // 103 Comments

The first-ever postmortem study of a patient vaccinated against COVID-19 has revealed that viral RNA was found in every organ of the patient's body, meaning that the vaccine is either ineffective or the coronavirus actually spreads faster in vaccinated individuals.

The scientific report out of Germany published by the International Journal of Infectious Diseases in June examined the autopsy of an 86-year-old man who had received a single dose of the SARS-CoV-2 vaccine but died 4 weeks later after becoming infected with the virus by a nearby patient at a hospital.

The first-ever postmortem study of a patient vaccinated against COVID-19 has revealed that viral RNA was found in every organ of the patient's body, meaning that the vaccine is either ineffective or the coronavirus actually spreads faster in vaccinated individuals.

These videos with all sorts of new information as to what's in the vaccines, what they will cause or the harm they will do, are coming out like hotcakes. Please keep your focus on Jesus Christ, keep the faith and trust Him to see you through all of this.
