

PASTOR ERUSTUS' HOUSE: UPDATE JAN – JULY 2021

Following pics from: 1-25-21

We are so excited here the house is coming up well. Glory to God.

God willing by mid February , we hope to be through with foundation work then we start building ground floor walls. Our government here from last month December,2020 increased taxes on everything from 14% to 16%.This has caused the increase in price of building materials. Despite this I have faith God will provide. Let's continue praying.

They are getting the materials to work on the foundation.

Working on the foundation.

Pastor said, we thank God for this big miracle of the house.

Filling the foundation with rocks and dirt.

They are spreading the concrete here. Pastor shared, Many are surprised here how a Pastor can build such a house. It is bringing glory to God. Praise our Lord Jesus Christ. Just to update you on the house. We are now though with the house foundation work.

I want to thank you all for your support in helping us to honor Pastor and his family. He has planted so many churches there in Africa and it is a blessing to be able to do this for him and his family.

The next pictures are of building material purchased February the first of 2021.

Delivery trucks bringing materials in.

They are unloading some kind of cement blocks.

Update on the house is that we are now raising the ground floor walls. This was the week of February 8th. The contractors estimate they may finish raising the ground floor walls plus the pillars by weekend.

Here are the ground floor walls going up.

The walls are getting higher.

And higher.

The following pictures are the progress through February 16, 2021.

Working on the walls.

It is taking shape.

July 14, 2021: Pastor about our House project I have collected some materials from the funds you have been sending. Our church member brother (husband to Pastor Issabellah) in charge of this work is really helping . We have bought & collected metal bars , sand, timber, concrete, hardcore , nails, binding wires, cement etc in preparation for laying the upper floor slab.

The living room of our current mud house has been demolished partly to finish up rising the walls that was remaining then they start laying the upper slab. Before end of this week.

Some of the materials.

Another picture with materials.

Yes Pastor as you saw in the pictures am surrounded here with neighbours. Initially I was alone who had bought in this land which was about 3 hectres but when I settled here it attracted others. I praise God I have good neighbours here.

This picture is showing that Pastor's mud house no longer has a living room. The blue wall was part of his old house.

Here is a better picture of no living room, they have placed a tarp to close of his home. He's been living without a living room for many months now.

You can see his old mud house there being torn into.

As you can see in the pictures we have covered the remaining part of our living room to continue using it. We are so excited by faith soon we will be enjoying staying in our dream house. Shalom Pastor

I asked Pastor how he would make do without a living room. Here is his reply: About my house , we have no option but to operate sometime without a living room. Just a small space left of the living room after part of it was cut off. We are also using my make shift car shed in our compound. But we thank God for everything Pastor. Nothing good comes easy Pastor, we will bear with the situation as keep on building the house.

About the house, Pastor don't be worried we will just manage. Once the slab is laid , we will fix windows and the door on one of the ground floor rooms to be used as the living room.

Thank you all for being part of this great work in blessing Pastor Erustus and his family, servants of God with a nice permanent home.
